**Architecture** James Steele, 2017-03-16 Contemporary Japanese Architecture presents a clear and comprehensive overview of the historical and cultural framework that informs the work of all Japanese architects as an introduction to an in depth investigation of the challenges now occupying the contemporary designers who will be the leaders of the next generation It separates out the young generation of Japanese architects from the crowded distinguished multi generational field they seek to join and investigates the topics that absorb them and the critical issues they face within the new economic reality of Japan and a shifting global order Salient points in the text are illustrated by beautiful descriptive images provided by the architects and from the extensive collection of the author By combining illustrations with timelines and graphics to explain complex ideas the book is accessible to any student seeking to understand contemporary Japanese architecture *Urban Spaces in Japan* Christoph Brumann, Evelyn Schulz, 2012-06-14 Urban Spaces in Japan explores the workings of power money and the public interest in the planning and design of Japanese space Through a set of vivid case studies of well known Japanese cities including Tokyo Kobe and Kyoto this book examines the potential of civil society in contemporary planning debates Further it addresses the implications of Japan's biggest social problem the demographic decline for Japanese cities and demonstrates the serious challenges and exciting possibilities that result from the impending end of Japan's urban growth Presenting a synthetic approach that reflects both the physical aspects and the social significance of urban spaces this book scrutinizes the precise patterns of urban expansion and shrinkage In doing so it also summarizes current theories of public space urban space and the body in space which are relevant to both Japan and the wider international debate With detailed case studies

**Rediscovering Japanese Space** Kishō Kurokawa,1988 *The Constructed Other: Japanese Architecture in the Western Mind* Kevin Nute,2021-09-30 The Constructed Other argues that the assumed otherness of Japanese architecture has made it both a testbed for Western architectural theories and a source of inspiration for Western designers The book traces three recurring themes in Western accounts of Japanese architecture from the reopening of Japan in the mid nineteenth century to the present day a wish to see Western architectural theories reflected in Japanese buildings efforts to integrate elements of Japanese architecture into Western buildings and a desire to connect contemporary Japanese architecture with Japanese tradition It is suggested that together these narratives have had the effect of creating what amounts to a mythical version of Japanese architecture often at odds with historical fact but which has exercised a powerful influence on the development of building design internationally

**Frank Lloyd Wright and Japan** Kevin Nute,2000 Looks at Wright s formal and philosophical debt to Japanese art and architecture Eight areas of influence are examined in detail from Japanese prints to specific individuals and publications and are illustrated with text and drawn analyses

House and Home in Modern Japan Jordan Sand,2005 A house is a site the bounds and focus of a community It is also an artifact a material extension of its occupants lives This book takes the Japanese house in both senses as site and as artifact and explores the spaces commodities and conceptions of community associated with it in the modern era As Japan modernized the principles that had traditionally related house and family began to break down Even where the traditional class markers surrounding the house persisted they became vessels for new meanings as housing was resituated in a new nexus of relations The house as artifact and the artifacts it housed were affected in turn The construction and ornament of houses ceased to be stable indications of their occupants social status the home became a means of personal expression and the act of dwelling was reconceived in terms of consumption Amid the breakdown of inherited meanings and the fluidity of modern society not only did the increased diversity of commodities lead to material elaboration of dwellings but home itself became an object of special attention its importance emphasized in writing invoked in politics and articulated in architectural design The aim of this book is to show the features of this culture of the home as it took shape in Japan

The Hypospace of Japanese Architecture Christopher Mead,2023-04 Traditional thought fused with modern science when Hiroshima s nuclear annihilation on August 6 1945 proved the interdependence of space and time Since the war Japanese architects have probed the relativity of spacetime through critical debates pivotal theories and consequential buildings The Hypospace of Japanese Architecture pushes past clich s of an exotic Japan to confront the modernity of an island nation whose habit of importing foreign ideas is less about assimilation than transformation less a process of indigenization than

one of cultural invention The realization that buildings are dynamic events phenomena of space in time not inert objects outside time continues to inform Japanese architecture and suggests how we can rethink the history theory and practice of architecture more generally
