Spaces For Children The Built Environment And Child Development:

Spaces for Children T.G. David,C.S. Weinstein,2013-11-11 As a developmental psychologist with a strong interest in children's response to the physical environment I take particular pleasure in writing a foreword to the present volume It provides impressive evidence of the concern that workers in environmental psychology and environmental design are displaying for the child as a user of the designed environment and indicates a recognition of the need to apply theory and findings from developmental and environmental psychology to the design of environments for children This seems to me to mark a shift in focus and concern from the earlier days of the interaction between environmental designers and psychologists that occurred some two decades ago and provided the impetus for the establishment of environmental psychology as a subdiscipline Whether because children though they are consumers of designed environments are not the architect's clients or because it seemed easier to work with adults who could be asked to make ratings of environmental spaces and comment on them at length a focus on the child in interaction with environments was comparatively slow in developing in the field of environment and behavior As the chapters of the present volume indicate that situation is no longer true today and this is a change that all concerned with the well being and optimal functioning of children will welcome **Spaces for**

Weinstein,2012-03-29 As a developmental psychologist with a strong interest in children's response to the physical environment I take particular pleasure in writing a foreword to the present volume It provides impressive evidence of the concern that workers in environmental psychology and environmental design are displaying for the child as a user of the designed environment and indicates a recognition of the need to apply theory and findings from developmental and environmental psychology to the design of environments for children This seems to me to mark a shift in focus and concern

from the earlier days of the interaction between environmental designers and psychologists that occurred some two decades ago and provided the impetus for the establishment of environmental psychology as a subdiscipline. Whether because children though they are consumers of designed environments are not the architects' clients or because it seemed easier to work with adults who could be asked to make ratings of environmental spaces and comment on them at length, a focus on the child in interaction with environments was comparatively slow in developing in the field of environment and behavior. As the chapters of the present volume indicate, that situation is no longer true today and this is a change that all concerned with the well-being and optimal functioning of children will welcome.

Landscapes for Learning Sharon Stine, 1996-12-06

Ask people what they remember most about the physical surroundings of their childhood and they're likely to describe a special place: out of doors, a school yard, a patch of woods, a community garden. For it is outside space that is most conducive to the ebb and flow of spontaneous activities, offers rich and often surprising sensory input and provides endless possibilities for exploration. If the classroom is the place where children are taught, the outdoors is where they learn on their own. A growing legion of landscape architects is exploring and exploiting the ability to create outdoor environments that optimize the learning experience and mirror the ideas, values, attitudes, and cultures of those who inhabit them. In *Landscapes for Learning*, Dr. Sharon Stine presents 11 case studies of the very best of these design projects from around the world. Her findings describe not only design concepts and end results, rich outdoor learning environments, but more importantly, the processes that led to the creation of these environments. She examines the roles of designers, teachers, and the children themselves and how their interaction affects the planning, building, and use of the space. Dr. Stine shows how the most successful designs address the needs of both the children, whose job it is to mess up the space, and the adults who supervise them. She defines nine pairs of contrasting elements that are essential to any play environment and uses these both as the basis for her analyses of particular environments and as the foundation of a common language that designers and educators can use when developing a new design. She also addresses the issues of safety and security and demonstrates that learning environments can be stimulating, interesting links with the natural world and safe places for children to run free. *Landscapes for Learning* is the ideal source for landscape architects, architects, planners, school administrators, and teachers who want to collaborate in the development of useful, intriguing outdoor environments for students in day care, preschool, elementary school, junior high, and high school. Discover the keys to creating delightful, stimulating, challenging, and educational outdoor environments for children and youth. This unique volume explores the vital and growing movement that is transforming school yards, day care facilities, and museum grounds around the world. Dr. Sharon Stine presents detailed analyses of a wide variety of outdoor environments for children and the principles and processes that enabled their design, creation, and ongoing operation. Special features of this book include: Eleven case studies of outstanding outdoor environments for children and youth, both contemporary and historical. More than 140 photos and line drawings that illustrate the application of specific design

principles Nine pairs of contrasting elements essential in any playenvironment that form the basis of a shared language for the designand analysis of outdoor learning environments In depth analyses of the development and evolution of outsidespace in two schools over a period of 80 years And much more EDRA; Proceedings of the Annual Environmental Design Research Association Conference Environmental Design Research Association,2007 *Journal of Nursery Education* ,1993

The Routledge Handbook on the Influence of Built Environments on Diverse Childhoods Kate Bishop,Katina Dimoulas,2024-07-01 Children and young people are often discussed as if they are homogenous groups The reality is of course very different with an enormous variation within each of these groups and in any domain of experience pertaining to childhood or adolescence Driven by personal sociocultural geographic or economic circumstances many children and young people worldwide are experiencing a totally different reality to those who fit with more mainstream patterns of childhood This has substantial implications for their sociophysical environmental experience and our understanding of their physical environmental needs The aim of this book is to draw attention to these alternate realities for a number of these groups of children and young people highlighting the unique and different considerations associated with their particular circumstances in each instance and identifying the repercussions for their physical environmental needs Ultimately this book creates an evidence based discussion which can be used by designers planners and policy makers and those delivering services and programs to children and young people as a basis to make informed decisions on how to work with the groups of children and young people in our book for better environmental provision *Euroscape symposia* International Association for People-Environment Studies. Conference,1992 **Children's Environments** ,1994 *Play and Child Development* Joe L. Frost,Sue Clark Wortham,Robert Stuart Reifel,2005 With significantly expanded discussions on key topics here is a revised edition of the popular early childhood book that more than any other book on the market ties play directly to child development Through a seamless blend of research theory and practical applications its comprehensive coverage addresses the full spectrum of play related topics The book analyzes play theories and play therapy presents a history of play and discusses current play trends It explores ways to create safe play environments for all children and how to weave play into school curricula Finally the authors examine the role of adults in leading and encouraging children s natural tendencies toward learning by playing Special coverage includes a full chapter on play and children with disabilities and the value of field trips in supporting learning For pre service and in service pre school and primary grade teachers Children's Environments Quarterly ,1995 **The Palgrave Handbook of Childhood Studies** J. Qvortrup,W. Corsaro,M. Honig,2016-04-30 A landmark publication in the field this state of the art reference work with contributions from leading thinkers across a range of disciplines is an essential guide to the study of children and childhood and sets out future research agendas for the subject **Young Children** ,1993 *Architecture Reading Lists and Course Outlines: Architectural design, Human behavior, Special topics* Georgia Bizios,1991 Children's Geographies Sarah L. Holloway,Gill Valentine,2004-11-23

Children's Geographies is an overview of a rapidly expanding area of cutting edge research. Drawing on original research and extensive case studies in Europe, North and South America, Africa and Asia, the book analyses children's experiences of playing, living and learning. The diverse case studies range from an historical analysis of gender relations in nineteenth century North American playgrounds through to children's experiences of after school care in contemporary Britain to street cultures amongst homeless children in Indonesia at the end of the twentieth century. Threaded through this empirical diversity is a common engagement with current debates about the nature of childhood. The individual chapters draw on contemporary sociological understandings of children's competence as social actors. In so doing they not only illustrate the importance of such an approach to our understandings of children's geographies, they also contribute to current debates about spatiality in the social studies of childhood.
