The first edition of *The Black Death* collected and analysed the many local studies on the disease published in a variety of languages and examined a range of scholarly papers. The medical and epidemiological characteristics of the disease, its geographical origin, its spread across Asia Minor, the Middle East, North Africa and Europe, and the mortality in the countries and regions for which there are satisfactory studies, are clearly presented and thoroughly discussed. The pattern, pace and seasonality of spread, revealed through close scrutiny of these studies, exactly reflect current medical work and standard studies on the epidemiology of bubonic plague. Benedictow's findings made it clear that the true mortality rate was far higher than had been previously thought. In the light of those findings, the discussion in the last part of the book, showing the Black Death as a turning point in history, takes on a new significance. OLE J BENEDICTOW is Professor of History at the University of Oslo. **Map Link Catalog**,2006 **Road Map Spain and Portugal** Automobile Association (Great Britain),1991-06-01 **Outlines of History; illustrated by numerous geographical and historical notes and maps...** **School edition** Marcus WILLSON,1863 **Catalogue of Printed Maps** British Museum.
