Spatial Formations:

Spatial Formations Nigel Thrift, 1996-06-13 This essential guide to social theory and space is written by one of the leading writers in the field Nigel Thrift explores the interconnections among people places and things and demonstrates why they must be examined in relation to each other rather than in isolation as is too often the case Spatial Formations presents a formidable analysis of how space is socially constructed unmade and reconstructed Thrift provides the reader with a direct understanding of how social theory can be used to make sense of spatial forms and practices and how spatial relations are made durable over space and time These themes are developed through case studies ranging from medieval time consciousness to the modern usage of maps

Mobility, Space and Culture Peter Merriman, 2012-07-26 Over the past ten to fifteen years there has emerged an increasing concern with mobility in the social sciences and humanities In *Mobility Space and Culture* Peter Merriman provides an important and timely contribution to the mobilities turn in the social sciences encouraging academics to rethink the relationship between movement embodied practices space and place The book takes an interdisciplinary approach drawing upon theoretical and empirical work from across the social sciences and humanities to provide a critical evaluation of the relationship between mobility and place site reformulating places as in process open and dynamic spatial formations Merriman draws upon post structuralist writings on space practice and society to demonstrate how movement is not simply practised or experienced in relation to space and time but gives rise to rhythms forces atmospheres affects and materialities which are often more crucial to embodied apprehensions of events than sensibilities of spatiality and temporality He draws upon detailed empirical research on experiences of and social reactions to driving in late Victorian and Edwardian Britain to trace how the motor car became associated with sensations of movement space and enmeshed with debates about embodiment health visibility gender and politics The book will be essential reading for undergraduates and postgraduates studying mobility in sociology geography cultural studies politics transport studies and history

Cleansing the City Michelle Elizabeth Allen, 2008 Cleansing the City Sanitary Geographies in Victorian London explores not only the challenges faced by reformers as they strove to clean up an increasingly filthy city but the resistance to their efforts Beginning in the 1830s reform minded citizens under the banner of sanitary improvement plunged into London's dark and dirty spaces and returned with the material they needed to promote public health legislation and magnificent projects of sanitary engineering Sanitary reform however was not always met with unqualified enthusiasm While some improvements such as slum clearances the development of sewerage and the embankment of the Thames may have made London a cleaner place to live these projects also destroyed and reshaped the built environment and in doing so altered the meanings and experiences of the city From the novels of Charles Dickens and George Gissing to anonymous magazine articles and pamphlets resistance to reform found expression in the nostalgic appreciation of a threatened urban landscape and anxiety about domestic autonomy in an era of networked sanitary services Cleansing the City emphasizes the disruptions and disorientation occasioned by purification a process we are generally inclined to see as positive By recovering these sometimes oppositional sometimes ambivalent responses Michelle Allen elevates a significant undercurrent of Victorian thought into the mainstream and thus provides insight into the contested nature of sanitary modernization

Tristania, 2009 **Cultural Turns/geographical Turns** Ian Cook, 2000 This book addresses the impact significance and characteristics of the cultural turn in contemporary geography It focuses on the development of the cultural geography

subdiscipline and on what has made it a peculiar and unique realm of study It demonstrates the importance of culture in the development of debates in other subdisciplines within geography and beyond In line with these previous themes the significance of space in the production of cultural values and expressions is also developed Along with its timely examination of the health of the cultural geographical subdiscipline this book is to be valued for its analysis of the impact of cultural theory on studies elsewhere in geography and of ideas of space and spatiality elsewhere in the social sciences The scope of the book is therefore broad covering work that spans the geographical discipline and even going beyond that to touch on debates in the social sciences and humanities The book s potential readership is also broad The summary chapters which precede each section will appeal to undergraduate students whilst chapters written by individuals leading their fields will be compulsory reading for researchers at all levels of higher education
