Charles A. Wedemeyer, 1981 Wedemeyer stresses that learning is a natural idiosyncratic and continually renewable human trait and survival resource. It is not dependent upon teaching, schooling or special environments although properly used these resources enhance learning. There is a powerful subculture of independent learners who are responsible for much of the real progress that has been made in most areas of endeavor.

**Language Learning Strategies. The Process of Becoming a Self-Regulated Learner in a Foreign Language Class** Elisabeth Grasi, 2020-09-30 Seminar paper from the year 2019 in the subject Didactics for the subject English Pedagogy Literature Studies grade 2 University of Applied Sciences Burgenland language English abstract The paper's primary concern is to outline strategies which teachers could use in order to support students in becoming self-regulated by using language learning strategies. Maria Montessori was one of the first pedagogues who emphasized independence, a degree of student autonomy and learning strategies that highlight learning through action rather than lecture. Children have been seen as naturally eager for knowledge. Thus, children are capable of initiating learning in a supportive, thoughtfully prepared learning environment. Based on pedagogical observations, it was discovered that children who were free to choose and act without restrictions within an environment prepared according to Montessori's model would act spontaneously for optimal development. Unfortunately, it is frequently observable that modern phenomena such as portable phones, computers, and television are a constant distraction, even for young children, and consequently tend to impede the students' learning of self-regulation. *Management of Independent Learning Systems* Peter (Lecturer Knight, Jo (University of Lancaster) Tait, 2013-01-11 This work focuses on the competences associated with self-motivated life-long learners who are accustomed to working with autonomy and provides models for exploring ways to develop competences in a changing world. **Learning for Themselves** Jeni Wilson, Kath Murdoch, 2009
