Soviet Space:

The Soviet Space Programme Ronald D. Humble, 2024-04-12 The Soviet Space Programme 1988 presents a comprehensive overview of the Soviet space programme from its beginnings up to the end of the 1980s One important theme explored is the degree to which the Soviet space programme was oriented towards military capabilities The book concludes that the degree of military involvement was indeed high **Soviet space programs**, 1988 Soviet Space Programs: Space science, space applications, military space programs, administration, resource burden, and master log of spaceflights, 1989 **Soviet Space Programs: Organization, Plans, Goals, and International Implications** United States. Congress. Senate. Third-Party Mediation and Peace Processes in the Post-Soviet Space Ana Maria Albulescu, 2025-12-31 This book examines the success of third party mediation in conflicts in the post Soviet space Third party mediation is the subject of an extensive literature dealing with the resolution of internal conflicts This volume examines the conditions that contribute to the success or failure of third party mediation and the positions and interests of mediators involved in the resolution of intra state internationalized conflict These topics are addressed with regard to the frozen conflicts in Abkhazia South Ossetia Transnistria Donbas and Nagorno Karabakh The book contributes timely research to a growing body of literature concerned with the resolution of intractable conflict in the post Soviet space and deals primarily with the role of external actors in addressing these conflicts It proposes a novel conceptual framework centred on norms power and interests to cover the relationships developed between third party mediators and primary parties in secessionist conflicts during negotiations for peace The book's core argument is that multiple competing proposals for settlement and the clashing interests of third parties often contribute to the increase in spoiling hindering the opportunity to take advantage of the ripe moment for peace This book will be of much interest to students of peace and conflict studies mediation eastern European and Central Asian politics and International Relations Soviet Space Mythologies Slava Gerovitch, 2015-06-18 From the start the Soviet human space program had an identity crisis Were cosmonauts heroic pilots steering their craft through the dangers of space or were they mere passengers riding safely aboard fully automated machines Tensions between Soviet cosmonauts and space engineers were reflected not only in the internal development of the space program but also in Soviet propaganda that wavered between praising daring heroes and flawless technologies Soviet Space Mythologies explores the history of the Soviet human space program within a political and cultural context giving particular attention to the two professional groups

space engineers and cosmonauts who secretly built and publicly represented the program Drawing on recent scholarship on memory and identity formation this book shows how both the myths of Soviet official history and privately circulating counter myths have served as instruments of collective memory and professional identity These practices shaped the evolving cultural image of the space age in popular Soviet imagination Soviet Space Mythologies provides a valuable resource for scholars and students of space history history of technology and Soviet and post Soviet history Soviet Space Programs, 1971-75, 1976 The Politics of Space William H. Schauer, 1976 The Rebirth of the Russian Space Program Brian Harvey, 2007-05-10 This fifty years after Sputnik is the definitive book on the Russian space program The author covers all the key elements of the current Russian space program including both manned and unmanned missions He examines the various types of unmanned applications programs as well as the crucial military program and even analyzes the infrastructure of production launch centres and tracking You ll also find discussion of the commercialization of the program and its relationship with western companies Russia s current space experiment is also put in a comparative global context Strong emphasis is placed on Russia s future space intentions and on new programs and missions in prospect **Soviets in Space** Colin Turbett, 2022-01-12 The victory over Nazi Germany in 1945 in which the Soviet Union played both the greatest part and suffered the greatest losses found the country in a state of devastation Military strength could not compensate for the damage wreaked by war especially in the western areas of the USSR Within just over ten years not only was Stalin dead and the relative freedoms of the Khrushchev Thaw in progress but the Soviet Union was ahead in the Space Race beating the enormous wealth and resources of the USA launching Soviet citizens from ordinary backgrounds quite literally into worlds beyond our own The communist dream seemed alive and well The story of those years has rarely been told from a Soviet perspective Cold War journalism and historical accounts written in the West tend to portray the space race in terms of ideological competition with success and failure mirroring power and influence in a world divided between capitalism and communism Whilst the military on both sides certainly benefited from the cutting edge technological advance of the space programmes for the people of the USSR the prestige of their successes offered proof that real existing socialism was moving mankind onto new levels of peaceful progress Agriculture and railway building initiatives tried to involved ordinary people in other pioneering projects to build socialism before the dream shattered in the 1980s Extensively illustrated with images from the time this book looks at the years of Soviet space success their background the personalities involved and their impact on the ordinary people of the USSR *Salyut : Soviet steps toward permanent human presence in space.*, 2008 As the other major spacefaring nation the Soviet Union is a subject of interest to the Congress in their deliberations concerning the future of U S space activities In the course of an assessment of Civilian Space Stations in 1983 the Office of Tech Assessment OTA undertook a study of the presence of Soviets in space their Salyut space stations The major element in this technical memorandum was a workshop held at OTA in Dec 1982 it was the first occasion when a significant number of experts in this

area of Soviet space activities had met for extended unclassified discussion As a result of the workshop OTA prepared this report Includes Graphic Comparison of Soviet U S Space Vehicles Illustrations **Soviet Space Program** A.J.
