**Аннотация.** В статье показана важность космического образования, как составной части Наук о Земле. Научные достижения в космической сфере и в области геоинформатики прочно вошли в нашу жизнь. Мы широко используем интернет, средства пространственной навигации, цифровые камеры и трехмерные цифровые панорамы. Космические технологии все шире внедряются в повседневную практику людей, однако, обучение этим технологиям в должной мере не производится. Такие науки как геоинформатика, геоэкология, геоинформационное картографирование, появились более 40 лет назад. Но в программы школьного образования они не входят, не в полной мере они изучаются и в ВУЗах.

Цель данной статьи является обратить внимание на недостаточное образование школьников в области Наук о Земле. В статье предлагаются разные способы исправления этой ситуации. Предлагается ранняя профориентация школьников в системе непрерывного образования в сфере космонавтики и геоинформационного сервиса. Для этого предлагается создать центры в профессиональной ориентации, занимающиеся подготовкой специалистов по профилям образовательной деятельности геоинформационного сервиса. Анализируется актуальность и перспективность работы таких центров. В статье предложено так же использование инженерных классов для обучения школьников космическим технологиям, с целью выработки у них космического мировоззрения. Поднимается проблематика реализации современной профессиональной ориентационной деятельности в структурных подразделениях высших учебных заведений. Предлагаются организационные решения по эффективной организации и функционированию центров дополнительного образования в части профориентации. Обучение подрастающего поколения самым передовым космическим технологиям позволит увеличить производительность труда в цифровом обществе и повысит обороноспособность страны.

**Ключевые слова:** космическое мировоззрение, геоинформационный сервис, дополнительное образование, профориентация, центры дополнительного образования, организация педагогической деятельности.
