Space For Women A History Of Women With The Right Stuff:

Space for Women Pamela Freni, 2002 A history of women who were recruited as potential astronauts early in the space race and their attempt to be the first females in space It tells of their success in the rigorous testing and training and then the ensuing resistance by the male dominated space program The book offers information on ensuing NASA programs culminating with the successful integration of women in today s space program Critical issues in the history of spaceflight Steven J. Dick, 2018 **Critical Issues in the History of Spaceflight** Stephen J. Dick, Steven J. Dick, Roger D. Launius, 2006 In March 2005 the NASA History Division and the Division of Space History at the National Air and Space Museum brought together a distinguished group of scholars to consider the state of the discipline of space history This volume is a collection of essays based on those deliberations The meeting took place at a time of extraordinary transformation for NASA stemming from the new Vision of Space Exploration announced by President George W Bush in January 2004 to go to the Moon Mars and beyond This Vision in turn stemmed from a deep reevaluation of NASA s goals in the wake of the Space Shuttle Columbia accident and the recommendations of the Columbia Accident Investigation Board The new goals were seen as initiating a New Age of Exploration and were placed in the context of the importance of exploration and discovery to the American experiences Apollo in the Age of Aquarius Neil M. Maher, 2017-03-27 In summer 1969 astronauts landed on the moon and hippie hordes descended on Woodstock two era defining events that are not entirely coincidental Neil M Maher shows how NASA s celestial aspirations were tethered to terrestrial concerns of the time the civil rights struggle the antiwar movement environmentalism feminism and the culture wars **Space Feminisms** Marie-Pier Boucher, Claire Webb, Annick Bureau, Nahum, 2024-01-25 Employing a global approach to feminist theory this book examines how scientific popular scholarly and artistic imaginations of space have since the 1950s reflected and embedded Earthly hopes anxieties and futures Rather than simply a platform for imagining the future it cultivates radical and alternative modes of inquiry around space through seeing space as a material reality that reflexively encodes humans self perceptions of their planet and beyond Bringing together essayistic reflections artworks and interviews with space scientists engineers and astronauts past and present in one volume *Space Feminisms* inspects the transformation of terrestrially held notions of gender race class and ableism as they migrate to the extraterrestrial whilst drawing new connections between feminist thought and extraterrestrial power structures *Space Feminisms* makes a radical enquiry into how earthly power structures are already expanding into our skies facilitating a collaborative and interdisciplinary platform for scholars artists and designers to imagine radical constructions of human futures beyond Earth At the intersection of scientific cultural social and artistic speculations the book gathers leading scholars scientists artists and designers to develop innovative tactics and disruptive participations to create generative alternative and radical futures of and in space **Journal of Women's History** , 2006 Gender and the Race for Space Erinn McComb, 2025-06-10 The American astronaut image was informed

by early Cold War ideals of masculinity that helped mold a distinctly American anti communist masculinity which appeared on the surface anyway to resolve not only an American crisis of masculinity but helped win the Cold War on an ideological and popular level This American image focused on strict gender binaries of man as the protector controlling technology and containing communism while woman was the passive actor with spaceflight technology left behind in the home waiting for the return of the astronaut husband Allowing women to fly into space would have represented a lack of individual control with spaceflight technology Smithsonian Studies in Air and Space ,1990 Great Lives from History Frank Northen Magill,1995 *Cosmodolphins* Mette Bryld,Nina Lykke,2000-01-02 Applying thinking on gender and the environment to research on science and technology this is an analysis of contemporary categorizations of human self versus wild other through three 20th century icons spaceships horoscopes and dolphins *The Journal of Military History* ,2006 *America, History and Life* ,2007 Article abstracts and citations of reviews and dissertations covering the United States and Canada Herstory Ruth Ashby,Deborah Gore Ohrn,1995 120 biographical sketches of such women as Artemisia Gentileschi Fanny Farmer the Trung sisters and Rigoberta Mench presented in one book that describes the world as if women mattered **The Griffith Observer** ,1999 *A Century of Women* Deborah G. Felder,1999 Chronicles the key events movements and personalities that shaped the twentieth century while profiling the many women who played a role in changing the course of history on a variety of social cultural and political levels 25 000 first printing **Science, Technology and Society** ,2000 *Documentation on Women, Children, and Human Rights* ,1999 **From Birdwomen to Skygirls** Fred Erisman,2009 Close on the heels of the American public s early enthusiasm over the airplane came aviation stories for the young From 1910 until the early 1960s they exalted flight and painted the airplane as the most modern and adventuresome of machines Most of the books were directed at boys however a substantial number sought a girls audience Erisman s account of several aviation series and other aviation books for girls fills a gap in the history and criticism of American popular culture It examines the stories of girls who took to the sky of the sources where authors found their inspiration and of the evolution of aviation as an enterprise open to all From the heady days of early aviation through the glory days of commercial air travel girls aviation books trace American women s participation in the field They also reflect changes in women s roles and status in American society as the sex sought greater equality with men As aviation technology improved the birdwomen of the pre World War I era capable and independent minded gave way to individualistic 1930s adventurers patterned on Amelia Earhart Jacqueline Cochran and other feminine notables of the air Their stories lead directly into the coming of commercial air travel Career stories paint the increasingly glamorous world of the 1940s and 1950s airline stewardess the unspoken assumptions lying behind that profession and the inexorable effects of technological and economic change By recovering these largely forgotten books and the social debates surrounding women s flying Erisman makes a substantial contribution to aviation history women s history and the study of juvenile literature This first comprehensive

study of a long overlooked topic recalls aviation experiences long past and poses provocative questions about Americans attitudes toward women and how those attitudes were conveyed to the young **Senior High Core Collection** Raymond W. Barber, Patrice Bartell, 2007 Features annotations for more than 6 200 works in the main volume 2007 and more than 2 400 new titles in three annual supplements published 2008 through 2010 New coverage of biographies art sports Islam the Middle East cultural diversity and other contemporary topics keeps your library s collection as current as today s headlines

50 Years of Solar System Exploration Linda Billings, 2012 To commemorate the 50th anniversary of the first successful planetary mission Mariner 2 sent to Venus in 1962 the NASA History Program Office the Division of Space History at the National Air and Space Museum NASA s Science Mission Directorate and the Jet Propulsion Laboratory organized a symposium Solar System Exploration 50 was held in Washington D C on 25 26 October 2012 The purpose of this symposium was to consider over the more than 50 year history of the Space Age what we have learned about the other bodies of the solar system and the processes by which we have learned it Symposium organizers asked authors to address broad topics relating to the history of solar system exploration such as various flight projects the development of space science disciplines the relationship between robotic exploration and human spaceflight the development of instruments and methodologies for scientific exploration as well as the development of theories about planetary science solar system origins and implications for other worlds The papers in this volume provide a richly textured picture of important developments and some colorful characters in a half century of solar system exploration A comprehensive history of the first 50 years of solar system exploration would fill many volumes What readers will find in this volume is a collection of interesting stories about money politics human resources commitment competition and cooperation and the faster better cheaper era of solar system exploration
