Space Dog Shock:

Space Dog Shock Andrew Martyr,1997 When Horatio first encounters a dog with a strange collar in his garden he is shocked to hear the dog speak He says he is called Spog and is lost Horatio and Spog go on a series of chaotic adventures before Spog s parents come to take him home 8 10 yrs *Space Dogs* Chris Dubbs,2003 Back when scientists knew nothing about space travel back when rockets were new a group of Russian cosmonauts rode rockets to the edge of space and into earth orbit These pioneer space travelers were dogs space dogs of the Soviet space program For 15 years space dogs occupied the world stage blazing trails as the first astronauts Their flights taught scientists how living beings reacted to rocket travel and tested the equipment that would be used for human space flight The age of the space dog extended from the first launch in 1951 until the final record breaking dog flight in 1966 Some dogs won world wide fame Most of them however worked and died in obscurity They were all pioneers of space travel And no one has ever told their story Until now Space Dogs dramatizes the training of the dogs the harrowing early flights the tragic accidents the fame that came to the program after the launch of Laika in Sputnik 2 and the final flights leading up to the first manned flight Space Dogs includes never before published photos from the archives of Novosti the Russian News Agency

Laika's Window Kurt Caswell,2018-09-18 Laika began her life as a stray dog on the streets of Moscow and died in 1957 aboard the Soviet satellite Sputnik II Initially the USSR reported that Laika the first animal to orbit the earth had survived in space for seven days providing valuable data that would make future manned space flight possible People believed that Laika died a painless death as her oxygen ran out Only in recent decades has the real story become public Laika died after only a few hours in orbit when her capsule overheated Laika s Window positions Laika as a long overdue hero for leading the way to human space exploration Kurt Caswell examines Laika s life and death and the speculation surrounding both Profiling the scientists behind Sputnik II he studies the political climate driven by the Cold War and the Space Race that expedited the satellite s development Through this intimate portrait of Laika we begin to understand what the dog experienced in the days and hours before the launch what she likely experienced during her last moments and what her flight means to history and to humanity While a few of the other space dog flights rival Laika s in endurance and technological advancements Caswell argues that Laika s flight serves as a tipping point in space exploration beyond which the dream of exploring nearby and distant planets opened into a kind of fever from which humanity has never recovered Examining the depth of human empathy what we are willing to risk and sacrifice in the name of scientific achievement and our exploration of the cosmos and how politics and marketing can influence it Laika s Window is also about our search to overcome loneliness and the role animals play in our drive to look far beyond the earth for answers
