Space Watching:

Space, Time and Ways of Seeing Mundoli Narayanan, 2021-08-23 This volume explores the constitutive role played by space in the performance of Kutiyattam. The only surviving form of Sanskrit theatre, Kutiyattam is distinctive in terms of its performance conventions and its unique culture of extensive elaboration and interpretation. Drawing upon the concepts of phenomenology on the processes of perception, particularly on the works of Edmund Husserl, Martin Heidegger and Maurice Merleau-Ponty, it analyses the role of space in the communicative structures of performance of Kutiyattam and its contribution to the production of meaning in theatre, especially in the context of contemporary theatre. The book explores the theatrical event as a phenomenon that comes into existence through a triangular relationship among the ways of being of the performers, the ways of seeing of the audience and the space which brings them together. Based on this formulation, Kutiyattam is approached as a theatre of elaboration made possible by the intimate proximal ways of seeing of the audience in the particular theatrical space of the *kuttampala*s, the temple theatres where Kutiyattam has customarily been performed for more than five centuries. This volume will be of great interest to scholars and researchers of cultural studies, theatre and performance studies, cultural anthropology, phenomenology and South Asian studies. **The Race to Space** Clive
