Spaceflight And Rocketry A Chronology:

Spaceflight and Rocketry David Baker,1996-01 Traces the development of aeronautic concepts and technology from early Greek steam turbines to the joint American Russian space missions

History of Rocketry & Space Travel Wernher Von Braun,Frederick Ira Ordway (III),1975 It reviews the work of three great pioneers of the early part of the twentieth century America s Goddard Germany s Oberth and Russia s Tsiolkovsky as well as the accomplishments of Esnault Pelterie in France Isaac Lubbock s work on liquid propellants in Great Britain and the development of the Russian Katyusha It details the experiments of von Braun and Walter R Dornberger in German before World War II and gives a full account of the work of their development team on the V 2 rocket at the Peenemunde Center The dramatic story of the German scientists surrender to American forces in 1945 as well as their eventual accomplishments at the Army s Redstone Arsenal and subsequently NASA s Marshal Space Flight Center in Huntsville Alabama is also told at first hand [Air University Library Index to Military Periodicals](#) ,1965

Aeronautical and Astronautical Resources of the Library of Congress Ronald S. Wilkinson,John F. Buydos,William J. Sittig,2007 The collections of the Library of Congress in the history of aeronautics are plausibly the best in the world Aside from some limited efforts describing aeronautics in the Library s special collections however no really substantial guide for researchers exists whose goal is to direct investigators to those resources on a Library wide basis Aeronautical and Astronautical Resources of the Library of Congress A Comprehensive Guide is the first comprehensive annotated guide to the Library s collections concerning the history of aeronautics and astronautics Excerpted from Preface page 9

Launch Magazine's History of Rockets and Model Rockets Mark Mayfield,2009-10-28 In 1954 before the United States had even launched its first satellite into orbit a Nebraska shoe salesman named Orville Carlisle developed a small black powder motor that could fire a toy rocket to 1 000 feet or more blast out a parachute with a small ejection charge and allow the model to float harmlessly to the ground America was hooked and hobby rocketry was born Complete with explanations of the events and scientific developments that led to the proliferation of hobby rocketry Launch Magazine s History of Rockets Model Rockets is a full color pictorial history of aerospace endeavors around the world [Aerospace America](#) ,2006

[Rocket to the Moon!](#) Don Brown,2019-03-05 On July 20 1969 Neil Armstrong took one small step for man one giant leap for mankind when the Apollo 11 landed on the moon But it wasn t just one man who got us to the moon Rocket to the Moon explores the people and technology that made the moon landing possible Instead of examining one person s life it focuses on the moon landing itself showing the events leading up to it and how it changed the world The book takes readers through the history of rocket building from ancient Chinese rockets to bombs bursting in air during the War of 1812 to Russia s Sputnik program to the moon landing Beautifully illustrated and well researched this book is the perfect resource for curious readers and

tomorrow's scientists It includes a timeline of space travel a bibliography and an index *Frontiers of Space Exploration* Roger D. Launius, 2004-03-30 Since the first rocket technology experiments of the early 20th century space exploration has captivated the world Recent advances and setbacks have included the new discoveries from the Galileo mission the Mars Global Surveyor's revelation that water once existed on the Red Planet the International Space Station the advent of space tourism and the devastating Space Shuttle disasters This one stop guide to space exploration provides a wealth of information for student researchers A substantial Chronology of Events and a narrative history outline the key events and people in the progression of space research and activity Five topical essays including a look at the Space Shuttle examine several significant issues related to the politics and technology of space exploration from an international perspective These chapters elucidate several sets of documents that give shape and substance to the larger story Primary documents in this volume are organized by theme and represent the variety of materials available to anyone seeking a better understanding of the rise of space exploration Also included are biographical sketches of key people associated with space flight a listing of the human space flight missions undertaken since 1961 and an annotated bibliography of additional reading **Technology and Culture**, 1999 **This New Ocean** Loyd S. Swenson, James M. Grimwood, Charles C. Alexander, 1966 Aerospace, 1997 *Book Review Digest*, 2000 **History of Rocketry and Astronautics** R. Cargill Hall, American Astronautical Society, 1986 The Rocket Men Rex Hall, Shayler David, 2001-04-10 This book is the first known work in the west dedicated to revealing the full story of the Vostok space missions and the first fledgling steps off our planet In *Leaving the Planet* authors Rex Hall and Dave Shayler review this Soviet demonstration of technological progress The text examines both the developmental and operational aspects of the missions which at the time were clouded in secrecy This fascinating and important text features a significant amount of new material on the spacecraft as well as the history design and development of the launch vehicle It also includes the full story of the men and women who trained for these missions some of whom never flew *Essays on the History of Rocketry and Astronautics*, 1977 *The Cumulative Book Index*, 1997 A world list of books in the English language **Reaching for the High Frontier** Michael Michaud, 1986-12-03 *Reaching for the High Frontier* tells the story of the pro space movement from the end of the moon landing program to the beginning of the space station program It describes the origins constituencies and goals of the various groups in the movement and reviews their tactics successes and the opportunities they may have missed **The Development of Propulsion Technology for U.S. Space-launch Vehicles** J. D. Hunley, 2007 In this definitive study J D Hunley traces the program's development from Goddard's early rockets and the German V 2 missile through the Titan IVA and the Space Shuttle with a focus on space launch vehicles Since these rockets often evolved from early missiles he pays considerable attention to missile technology not as an end in itself but as a contributor to launch vehicle technology Focusing especially on the engineering culture of the program Hunley communicates this very human side of technological development by means of anecdotes character sketches

and case studies of problems faced by rocket engineers He shows how such a highly adaptive approach enabled the evolution of a hugely complicated technology that was impressive but decidedly not rocket science Unique in its single volume coverage of the evolution of launch vehicle technology from 1926 to 1991 this meticulously researched work will inform scholars and engineers interested in the history of technology and innovation as well as those specializing in the history of space flight *Essays on the History of Rocketry and Astronautics: Proceedings of the Third Through the Sixth History Symposia of the International Academy of Astronautics, Volume 2 ,1977*
