## **Metazoa**

Peter Godfrey-Smith,2020-11-10 Enthralling breathtaking Metazoa brings an extraordinary and astute look at our own mind s essential link to the animal world The New York Times Book Review Editors Choice A great book Godfrey Smith is brilliant at describing just what he sees the patterns of behaviour of the animals he observes Nigel Warburton Five Books The scuba diving philosopher who wrote Other Minds explores the origins of animal consciousness Dip below the ocean s surface and you are soon confronted by forms of life that could not seem more foreign to our own sea sponges soft corals and serpulid worms whose rooted bodies intricate geometry and flower like appendages are more reminiscent of plant life or even architecture than anything recognizably animal Yet these creatures are our cousins As fellow members of the animal kingdom the Metazoa they can teach us much about the evolutionary origins of not only our bodies but also our minds In his acclaimed 2016 book Other Minds the philosopher and scuba diver Peter Godfrey Smith explored the mind of the octopus the closest thing to an intelligent alien on Earth In Metazoa Godfrey Smith expands his inquiry to animals at large investigating the evolution of subjective experience with the assistance of far flung species As he delves into what it feels like to perceive and interact with the world as other life forms do Godfrey Smith shows that the appearance of the animal body well over half

a billion years ago was a profound innovation that set life upon a new path In accessible riveting prose he charts the ways that subsequent evolutionary developments eyes that track for example and bodies that move through and manipulate the environment shaped the subjective lives of animals Following the evolutionary paths of a glass sponge soft coral banded shrimp octopus and fish then moving onto land and the world of insects birds and primates like ourselves Metazoa gathers their stories together in a way that bridges the gap between mind and matter addressing one of the most vexing philosophical problems that of consciousness Combining vivid animal encounters with philosophical reflections and the latest news from biology Metazoa reveals that even in our high tech AI driven times there is no understanding our minds without understanding nerves muscles and active bodies The story that results is as rich and vibrant as life itself **Alexander**
