Piotr Skowroński,2007 George Santayana 1863 1952 a Spanish American philosopher is an influential personage on the
cultural stage in English and Spanish speaking countries His numerous books and papers on topics as varied as epistemology
ontology aesthetics ethics anthropology value theory and American studies along with his best selling novel his sophisticated
poetry and his famous autobiography make him a vivid and profound source of reflection on the history of American and
European thought as well as a stimulus for future work Santayana TM s exceptionality was appreciated by William James and
Josiah Royce his most eminent colleagues in Harvard University TM s Department of Philosophy and has been discussed by
such respected authors as John Dewey Bertrand Russell Charles Hartshorne Eric Voegelin Alfred Schutz Richard Rorty Hilary
Putnam Arthur Danto and Ferdinand Savater among others This book aims to understand Santayana by considering his often
provocative views on America Other scholars have reconstructed his thought at various times and in a variety of ways but no
one has yet considered Santayana TM s approach toward America in a serious and profound way at least not in the English
language This book attempts to convince the reader that the impartiality of Santayana TM s philosophy its transcendence of
cultural limits and mental borders makes it a living philosophy and that this is the strongest aspect of Santayana TM s
thought [Readings in twentieth-century philosophy](#) James B Hartman,1967 **Competence in Adult Education** Michael
