Socially Sustainable Cities Antoine Bailly, 2000 Texts adapted translated and edited by Marie Clare Rey and Roderick Lawrence from the papers presented at the UNESCO MOST colloquiums in Geneva and Cape Town *Socially Sustainable Cities* Antoine Bailly, 2000 Texts adapted translated and edited by Marie Clare Rey and Roderick Lawrence from the papers presented at the UNESCO MOST colloquiums in Geneva and Cape Town *Urban Regeneration and Social Sustainability* Andrea Colantonio, Tim Dixon, 2011-02-02 Urban regeneration is a key focus for public policy throughout Europe This book examines social sustainability and analyses its meaning The authors offer a comprehensive European perspective to identify best practices in sustainable urban regeneration in five major cities in Spain Italy Netherlands Germany and the UK This authoritative overview of the scholarly literature makes the book essential reading for researchers and post graduate students in sustainable development real estate geography urban studies and urban planning as well as consultants and policy advisors in urban regeneration and the built environment **Urban Social Sustainability** M. Reza Shirazi, Ramin Keivani, 2019-01-22 This ground breaking volume raises radical critiques and proposes innovative solutions for social sustainability in the built environment Urban Social Sustainability provides an in depth insight into the discourse and argues that every urban intervention has a social sustainability dimension that needs to be taken into consideration and incorporated into a comprehensive and cohesive urban agenda that is built on three principles of recognition integration and monitoring This should be achieved through a dialogical and reflexive process of decision making To achieve sustainable communities social sustainability should form the basis of a constructive dialogue and be interlinked with other areas of sustainable development This book underlines the urgency of approaching social sustainability as an urban agenda and goes on to make suggestions about its formulation Urban Social Sustainability consists of original contributions from academics and experts within the field and explores the significance of social sustainability from different perspectives Areas covered include urban policy transportation and mobility urban space and architectural form housing urban heritage neighbourhood development and urban governance Drawing on case studies from a number of countries and world regions the book presents a multifaceted and interdisciplinary understanding from social sustainability in urban settings and provides practitioners and policy makers with innovative recommendations to achieve more socially sustainable urban environment **Proceedings of the ... Conference of the Hong Kong Society for Transportation Studies** Hong Kong Society for Transportation Studies. Conference, 2006 **The Sustainable City VIII (2 Volume Set)** S.S. Zubir, C.A. Brebbia, 2013-12-03 With majority of the Earth's people now urban dwellers and cities being the most efficient habitat for the utilisation of resources it is imperative that we continue to support standards of living and efficiencies of urban areas However the urbanisation process has not been without its problems While much has been done to address the original issues surrounding the quality of urban life new challenges continue to arise It is no longer sustainable to achieve improvements by means that require greater and greater

energy consumption as we did in the past. Despite their complexity, however, cities are a great laboratory for architects, engineers, and other key professionals to apply new ideas and new technology to meet our requirements for more sustainable city environments. Containing papers presented at the latest in a series of conferences organised by the Wessex Institute of Technology, these proceedings split into two volumes addressing not just environmental, architectural, and engineering concerns but also quality of life, security risk, and heritage. The diversity of topics and the case studies based on existing projects make the book an important contribution to the literature on urban planning.

Sustainable Cities: Pioneering Approaches to Green Urbanism and Climate Resilience Simon Elias Bibri, Giuseppe Resta, Dorina Papa, Dina Magnaye, 2025-09-26

The book studies specific aspects of urban planning and environmental management aiming to provide actionable insights and solutions. This book opens with an analysis of urban processes and the development of mass housing estates using Famagusta, Cyprus, as a case study. It highlights how topographical factors influence urban growth and housing patterns, providing important implications for infrastructure planning. A significant focus is placed on the development of environmentally friendly building materials. Several chapters explore the use of waste products such as cork in creating sustainable materials. Green and blue infrastructure also receive substantial attention. The book addresses strategies for integrating these elements into urban environments to combat climate change. Topics such as the retention capacity of green roofs and the role of vegetation in improving urban air quality underscore the importance of ecological infrastructure in creating resilient cities. The book further studies urban climate and pollution analysis, presenting advanced methods for monitoring and managing environmental conditions. Chapters on climate change monitoring, air pollution assessment through bryophytes and VOCs monitoring, provide tools for understanding and addressing urban environmental challenges. Human-centric design is another key theme, with discussions on pedestrian comfort and walkability in urban spaces. By focusing on outdoor promenades and thermal comfort, the book highlights the need for urban designs that enhance the quality of life for residents. Practical approaches to project management and planning are also covered. The book introduces methodologies such as PERT, CPM, and Monte Carlo simulation techniques for improving project outcomes and developing criteria for climate-friendly planning competitions. Finally, the preservation of landscape heritage amidst urban expansion is explored. A methodology for creating a landscape catalog in Arequipa, Peru, is presented as a way to balance development with the conservation of cultural and natural landscapes.

Social and Cultural Aspects of the Circular Economy Viktor Pál, 2022-06-15

This collection of essays brings together discussions arguing that the circular economy must be linked to society and culture in order to create a viable concept for remodelling the economy. Covering a diverse range of topics and regions, including cities and living food and human waste packaging and law, fashion design, and art, this book provides a multi-layered examination of circularity. Transitioning to a circular economy, reducing resource input and waste, and narrowing material and energy loops are becoming increasingly important targets to combat decades of unsustainable models of consumption. However, they will

require a significant shift in social and cultural thinking and these dimensions have not yet been factored into policy debates and frameworks While recognising the key role of individual consumers and their behaviours the book goes beyond this singular perspective to provide equal focus on institutional and political structures as necessary drivers for real change Social and Cultural Aspects of the Circular Economy argues for a social and solidarity economy SSE to combine individual actions with a wider cultural shift It will be an important read for scholars researchers students and policy makers in the circular economy waste studies consumption and other environmentally focused social sciences *Sustainable Cities Development and Environment Protection IV* Guang Fan Li,Chao He Chen,Bi Feng Jiang,Qi Zhong Shen,2014-07-04 Selected peer reviewed papers from the 4th International Conference on Civil Engineering Architecture and Building Materials CEABM 2014 May 24 25 2014 Haikou China *Urban India* ,2003 The Challenge of Sustainable Cities Rod Burgess,Marisa Carmona,Theo Kolstee,1997-09-15 This volume by urban planners and architects assesses the current state of play between urban theory policy and architectural and planning practice in developing countries It explains and criticises what is happening in cities in an era now dominated by neoliberal development policy compares and contrasts the various policy and planning approaches and explores how they are changing the role of architects planners and other professionals The contributors focus on the principal issues that exist in urban environmental strategy the spatial restructuring of cities and the attempts to foster more participation in urban programmes and management The originality of thought the diversity of case material and the specific policy focus make this book an important contribution to the formulation of future urban strategies in the South *Implementing ESG into Real Estate Contracts* Sabine Wieduwilt,2025-01-07 This book looks into different aspects of implementing ESG into real estate contracts from a European perspective It covers general aspects contract type specific aspects and then property usage type specific aspects General topics cover legal frameworks the social and governance perspective based on EU sustainable finance regulations Contract type specific questions cover different contract types The team of authors then addresses specific issues relating to different types of property use such as office retail logistics hospitality and data centres The focus of the work is on EU so that the content can provide food for thought for the work in different EU countries The book thus supports practitioners in compiling their personal toolkit for use in individual cases Content Terms concepts and basics of sustainability CSR and ESG What ESG in real estate contracts means Standards for non financial sustainability reporting CSRD and ESRS Climate litigation energy and renewables data Sustainability and competition law brownfields Pre contracts and recitals ESG and real estate investment leases real estate financing *Time-Saver Standards for Urban Design* Donald Watson,Alan J.
