Crafting Textiles in the Digital Age Nithikul Nimkulrat, Faith

Kane, Kerry Walton, 2016-09-08 In an era of increasingly available digital resources many textile designers and makers find themselves at an interesting juncture between traditional craft processes and newer digital technologies Highly specialized craft design practitioners may now elect to make use of digital processes in their work but often choose not to abandon craft skills fundamental to their practice and aim to balance the complex connection between craft and digital processes The essays collected here consider this transition from the viewpoint of aesthetic opportunity arising in the textile designer's hands on experimentation with material and digital technologies available in the present Craft provides the foundations for thinking within the design and production of textiles and as such may provide some clues in the transition to creative and thoughtful use of current and future digital technologies Within the framework of current challenges relating to sustainable development globalization and economic constraints it is important to interrogate and question how we might go about using established and emerging technologies in textiles in a positive manner

The Culture of Knitting Joanne Turney, 2009-08-01 From booties and scarves to art and fashion The Culture of Knitting addresses knitting as art craft design fashion and performance and as an aspect of the everyday Drawing on a variety of sources including interviews with knitters from different disciplines as well as amateurs the text breaks down hierarchical boundaries and stereotypical assumptions that have previously negated the academic study of knitting The book also highlights the diversity and complexity of knitting in all its guises The Culture of Knitting investigates not merely why knitting is so popular now but also the reasons why knitting has such longevity By assessing the literature of knitting manuals patterns social and regional histories alongside testimonial discussions with artists designers craftspeople and amateurs the book offers new ways of seeing and new methods of critiquing knitting without the constraints of disciplinary boundaries in the hope of creating an environment in which knitting can be valued recognized and discussed
