*The Otherness of God* Orrin F. Summerell, 1998 This volume offers essays on the nature of God and the fundamental tasks of philosophy and theology written by internationally recognized thinkers in the distinct fields of philosophy religious studies and theology The Otherness of God traces the lineage of its theme from Plato and Aristotle through Neoplatonic medieval and Renaissance expression and on through Reformation thought and German idealism to dialectical theology and deconstruction This provocative collection drawn primarily from an interdisciplinary conference at the University of Virginia should attract those interested in the philosophy of religion the history of philosophy and theology and the theological interpretation of secular culture

*The Otherness of English* Probal Dasgupta, 1993-05-25 This book offers a unique interpretation of the content of the English language in India Presenting an interdisciplinary account based on his critique of earlier research the author explains the reasons for the poverty of modern India s English and the role it plays in the general process of modernization and demonstrates how it occupies a functional slot in India s linguistic space

**Thinking about Law** Oren Ben-Dor, 2007-10-04 What calls for thinking about law What does it mean to think about What is aboutness Could it be that law in its essence has not yet been thought about In exploring these questions this book closely reads Heidegger s thought especially his later poetical writings Heidegger s transformation of the very notion and process of thinking has destabilising implications for the formation of any theory of law however critical this theory may be The transformation of thinking also affects the notions of ethics and morality and the manner in which law relates to them Interpretations of Heidegger s unique

understanding of notions such as essence thinking language truth and nearness come together to indicate the otherness of the essence of law from what is referred to as the legal If the essence of law has not yet been thought about what generates deafness to the call for such thinking thereby entrenching a refuge for legalism The ambit of the legal is traced to Levinasian ethics especially to his notion of otherness despite such a notion being apparently highly critical of the totality of the legal In entrenching the legal it is argued that Levinas s notion of otherness does not reflect thinking that is otherwise than ontology but rather radicalises and maintains a derivative ontology A call for thinking about law is then connected to Heideggerian

ontologically based otherness upon which ethical reflection that the essence of law protects is grounded

*Power in the Global Age* Ulrich Beck, 2005 One of Europe s leading social thinkers throws light on the global power games being played out between global business nation states and movements rooted in civil society Ulrich Beck offers an account of the changing nature of power in the global age and assesses the influence of the counter powers

*The Other* Helen Fielding, 2007-04-25 The western philosophical tradition with its focus on universal concepts and a presumed neuter but ultimately male subject has only relatively recently become open to the question of alterity in particular the alterity of woman as the other of man The essays of this volume reflect in particular on the ethical implications of taking the feminine other into account This necessitates a rethinking of the implicit structures of Western philosophy which continue to exclude women as

subjects who contribute to the conceptualization of world and society This volume which gives voice to women philosophers is a contribution to that task     The Development from Kant to Hegel Andrew Seth Pringle-Pattison,1882     **The Journal of speculative philosophy** ,1878     **Forum** Loretta Sutton Metcalf,Walter Hines Page,Joseph Mayer Rice, Frederic Taber Cooper,Arthur Hooley,George Henry Payne, Henry Goddard Leach,D.
