## **The Penumbra:**

The Penumbra Unbound Brook Ziporyn, 2012-02-01 The Penumbra Unbound is the first English language book length study of the Neo Taoist thinker Guo Xiang d 312 C E commentator on the classic Taoist text the Zhuangzi The author explores Guo s philosophy of freedom and spontaneity explains its coherence and importance and shows its influence on later Chinese philosophy particularly Chan Buddhism The implications of his thought on freedom versus determinism are also considered in comparison to several positions advanced in the history of Western philosophy notably those of Spinoza Kant Schopenhauer Fichte and Hegel Guo s thought reinterprets the classical pronouncements about the Tao so that it in no way signifies any kind of metaphysical absolute underlying appearances but rather means literally nothing This absence of anything beyond appearances is the first premise in Guo s development of a theory of radical freedom one in which all phenomenal things are self so creating and transforming themselves without depending on any justification beyond their own temporary being

*The Penumbra and the Changes in the Effective Rigidity of the Geomagnetic Cosmic Ray Cutoff with Change of the Primary Spectrum in a Quiescent Geomagnetic Field* L. I. Dorman, R. T. Gussina, 1970 The calculation is presented for the effective rigidity of the geomagnetic cutoff in the presence of the penumbra and the change in this rigidity according to detection of various components at geomagnetic latitudes of 30 40 and 50 degrees The calculations are made for satellite altitudes and in the atmosphere as follows for the neutron component at an altitude of 10 km at mountain levels and at sea level for the hard component at an altitude of 10 km at sea level and underground at the depths of 3 and 7 meters water equivalent Also found are the expected changes in the effective cutoff rigidity of various instruments for a quiescent geomagnetic field when primary variations occur as a result of chromospheric eruptions or various types of cosmic ray modulation effects

**The Penumbra of Personhood** G.V. Loewen, 2020-09-17 The drive to overcome nature is a projection of the anxiety about succumbing to our own nature Inevitably this conflict creates a vicious circle For in subduing nature to our technical goals themselves arranged so that our human frailty is to be overcome we end up destroying the world in which we must live Of late we have begun to recognize this viciousness both in our acts and more profoundly in our thoughts Yet the attempt to lose our nature by losing Nature holds an even deeper conflict The most effective means of escaping spiritual trial is to become spiritless and the sooner the better If only taken care of in time everything takes care of itself Kierkegaard 1844 Social philosopher G V Loewen is the author of forty books on ethics education aesthetics religion health and social theory and more recently metaphysical adventure fiction He was a professor in the interdisciplinary human sciences for two decades The Penumbra of Personhood is not only the cumulative effect and expression of the primordial characters of Dasein flung along with my being into the world writes the author it is also the most graceful and eloquent response to the unknown that we possess It is in its

own thrown essence the fullest divergence from any violence of the reactionary or technique of the manager It is objectively what we are and thus what we have to offer our own time Ironically the State has to contend not with history the writing of which it mainly controls but rather morality part of the pre State metaphysics and a version of collective human vanity that also claims to be timeless If it is at first striking that even in our time morality has retained such a hold on second glance it is at least not surprising It has ironically become the weapon of the private person and this is very much against its own cosmogonical backdrop Morality is shared as is belief that the one stems from the other and in this they are quite unlike either ethics or opinion also having become the pedestal upon which any demagogue can be placed The uttering of a higher law betrays the moralist at every turn Even if the State can delicately navigate these potentially dangerous currents while affording to ignore mere moral editorializing an inevitable whirlpool in any democracy at least if enough private people recognize that their misgivings are shared morality can once again assume a vestige of its former mantle It becomes a rip tide of conventional wisdom against which this or that elected regime may ride or be ridden over If this is the most vulgar expression of Dasein s will to life and even ontically will to freedom then it cannot be ignored by the reflective person It is the final avenue of appeal in a rationalist social organization Equipped with its own divinity morality finds that it still has some suasion in the courts certainly within many families and in the schools It is society s back door man to use an old Blues phrase to point up its consistent vulgarity

**The Penumbra of Ethics** V. A. Demant, 2018-04-18 Rev Vigo Auguste Demant 1893 1983 was a significant theologian and social commentator of the first half of the twentieth century This book contains his up until now unpublished Gifford Lectures in which Demant provides cultural analysis as he attempts to address why humanity struggles so much with modernity and living in the contemporary world The lectures have additional notes and commentary to make them comprehensible since not all of them are complete The first chapters set Demant in his context and the final section provides assessment of both his ideas and his impact Although Demant died in 1983 his ideas continue to prove influential to thinkers and theologians today
