Marijan Topic,2017-11-06 Master s Thesis from the year 2017 in the subject Business economics Business Management  
Corporate Governance Friedrich Alexander University Erlangen Nuremberg language English abstract The goal of this  
Master s thesis is to examine the relationship between managerial OR and business model innovations BMIs in established  
organizations In order to meet the complexity of the topic this thesis is focused on factors that hinder or help managers in  
recognizing business opportunities Focusing on incumbent firms this paper conducts further research to identify the main  
influencing factors including challenges vulnerabilities and obstacles The thesis is divided into six parts starting with a brief  
description of the research topic including the problem position and objective Second a literature review is conducted to  
summarize the state of research including theoretical foundations In today s scientific literature the two fields of research  
BMI OR are by no means treated independently from each other For the time being BMI and OR are considered  
independently of each other It is then shown exactly how current literature treats managerial OR with respect to BMI The  
results are then synthesized into a summary highlighting what is known and not known The areas of controversy in the  
literature are identified and questions are formulated that need further research The third part of the thesis consists of  
expert interviews Derived from the literature review a guideline for interviews is developed to treat the research gaps in an  
appropriate way and to meet the complexity of the task setting The explorative survey aims to identify the challenges and  
drivers of managerial OR in BMI and to identify approaches that have not yet been addressed in scientific literature to a  
significant extent The core of the analysis is the splitting of the BM into the elements value proposition value creation and  
value capture This ensures that all the facets of a company s BM are accurately addressed and form the basis for high quality  
results In order to cover a broad range the paper does not focus on a certain industry The interviews are conducted with an  
array of decision makers in organizations that have attempted or are currently attempting to innovate their BM at the  
business unit level or the corporate level      **The Quarterly Journal of Pure and Applied Mathematics** James Joseph
