**Failed Historical Scientific Instruments** ,2024-06-11 Can a scientific instrument be regarded as a failure Why and how By shedding light on the complexity of these questions the volume marks a step forward in the way historical scientific instruments can be analysed and displayed The essays show how diverse failures can be and how the assessment of scientific devices may change over time some surprisingly becoming more successful In addition to studies of how technical features led to failure the authors examine the roles played by social bias and behaviour commercial and economic circumstances and political factors [How Scientific Instruments Have Changed Hands](#) ,2016-09-12 This collection of essays discusses the marketing of scientific and medical instruments from the eighteenth century to the First World War The evidence presented here is derived from sources as diverse as contemporary trade literature through newspaper advertisements to rarely surviving inventories and from the instruments themselves The picture may not yet be complete but it has been acknowledged that it is more complex than sketched out twenty five or even fifty years ago Here is a collection of case studies from the United Kingdom the Americas and Europe showing instruments moving from maker to market place and to some extent what happened next Contributors are Alexi Baker Paolo Brenni Laura Ch zaro Gloria Clifton Peggy Aldrich Kidwell Richard L Kremer A D Morrison Low Joshua Nall Sara J Schechner and Liba Taub

**Irish National Inventory of Historic Scientific Instruments** Charles Mollan,1995-11-15 Carried out over a period of ten years this is a listing of scientific instruments dating before 1920 preserved in many collections throughout the island of Ireland It gives location date and description for each of the more than 5 000 entries together where appropriate with relevant accompanying detail It demonstrates clearly that Ireland has an important resource which hitherto had not been appreciated It also preserves information about collections which have since been lost sold or otherwise dispersed

**Astrolabes from Medieval Europe** David A. King,2024-10-28 This is the fourth set of studies in the Variorum series by David King a leading authority on the history of astronomy in Islamic civilization and on medieval astronomical instruments European as well as Islamic The first of the eleven studies collected here deals with medieval instruments in general as precious historical sources The following papers focus on individual astrolabes from the European Middle Ages and early Renaissance that are of singular historical importance Two look at the origins of the simple universal horary quadrant and the complicated universal horary dial navicula The collection concludes with a list of all known medieval European astrolabes ordered chronologically by region Three landmark astrolabes are discussed 1 the earliest known European astrolabe from 10th

century Catalonia that milieu in which the astrolabe first became known to Europeans 2 an astrolabe from 14th century Picardy bearing numerals written in monastic ciphers as well as a later dedication mentioning two friends of Erasmus 3 the splendid astrolabe presented in 1462 by the German astronomer Regiomontanus to his patron Cardinal Bessarion with its enigmatic angel and Latin dedication here presented in the context of other astrolabes of similar design from 15th century Vienna

**Early American Technology** Judith A. McGaw,2014-01-01 This collection of original essays documents technology's centrality to the history of early America. Unlike much previous scholarship this volume emphasizes the quotidian rather than the exceptional the farm household seeking to preserve food or acquire tools the surveyor balancing economic and technical considerations while laying out a turnpike the woman of child bearing age employing herbal contraceptives and the neighbors of a polluted urban stream debating issues of property odor and health. These cases and others drawn from brewing mining farming and woodworking enable the authors to address recent historiographic concerns including the environmental aspects of technological change and the gendered nature of technical knowledge. Brooke Hindle's classic 1966 essay on early American technology is also reprinted and his view of the field is reassessed. A bibliographical essay and summary of Hindle's bibliographic findings conclude the volume. The contributors are Judith A McGaw Robert C Post Susan E Klepp Michal McMahon Patrick W O Bannon Sarah F McMahon Donald C Jackson Robert B Gordon Carolyn C Cooper and Nina E Lerman

**Technology in Early America** Brooke Hindle,2012-12-01 This interpretative essay and extensive bibliography surveying the chronology and major characteristics of American technology before 1850 is the first available guide in this period to the rapidly developing field of the history of technology.
