Each article features colour photographs and other illustrations to expand on the text, and the book is organized alphabetically to aid quick access Oxford First Book of Science Nina Morgan, 2003 Part of The Oxford First Book series, this title presents and explains the themes of science with the emphasis on practical applications required by the National Curriculum at KS1 and early KS2. It includes themes such as life processes, materials, pushes and pulls, and light and sound. It also includes Glossary and Index **The Oxford Children's Science Library** Oxford University Press, 1995-01-01 This set collects three of our most popular introductory reference books on the world of nature, all lavishly designed in full color and packed with fascinating facts. *The Living World* explores the beguiling world of animals and plants, including sections on amphibians, birds, reptiles and even dinosaurs. A fine blend of bright, appealing color illustrations and practical science facts. *Children's Bookwatch Planet Earth* is a wide-ranging look at our world, featuring geography, environment, weather and a whistle-stop tour through continents and countries. *Science and Technology* is an excellent resource. School Library Journal for the budding young scientist who needs an easily accessible springboard to the fundamentals of science, from black holes to the secrets of the vacuum cleaner **Handbook of Child Psychology and Developmental Science, Cognitive Processes**, 2015-04-06 The essential reference for human development theory, updated and reconceptualized. The *Handbook of Child Psychology and Developmental Science*, a four-volume reference, is the field-defining work to which all others are compared. First published in 1946 and now in its Seventh Edition, the Handbook has long been considered the definitive guide to the field of developmental science. Volume 2, *Cognitive Processes*, describes cognitive development as a relational phenomenon that can be studied only as part of a larger whole of the person and context relational system that sustains it. In this volume, specific domains of cognitive development are contextualized with respect to biological processes and sociocultural contexts. Furthermore, key themes and issues, e.g. the importance of symbolic systems and social

understanding are threaded across multiple chapters although every each chapter is focused on a different domain within cognitive development Thus both within and across chapters the complexity and interconnectivity of cognitive development are well illuminated Learn about the inextricable intertwining of perceptual development motor development emotional development and brain development Understand the complexity of cognitive development without misleading simplification reducing cognitive development to its biological substrates or viewing it as a passive socialization process Discover how each portion of the developmental process contributes to subsequent cognitive development Examine the multiple processes such as categorizing reasoning thinking decision making and judgment that comprise cognition The scholarship within this volume and as well across the four volumes of this edition illustrate that developmental science is in the midst of a very exciting period There is a paradigm shift that involves increasingly greater understanding of how to describe explain and optimize the course of human life for diverse individuals living within diverse contexts This Handbook is the definitive reference for educators policy makers researchers students and practitioners in human development psychology sociology anthropology and neuroscience

The Oxford Children's Encyclopedia of Plants and Animals Oxford Staff, 2000 Now in paperback The Oxford Children's Encyclopedia of Plants and Animals is a major reference book for children of 8 and over Some 140 major entries explore the key issues and each article features colour photos and other illustrations specially selected to expand on the information given in the text

The articles are arranged alphabetically from Algae to Zoos to allow quick access to information The text checked by experts throughout has been brought completely up to date all text written and checked by our large team of expert writers and consultants 140 major entries 60 000 words A Z format allows quick access to information fully indexed and cross referenced to encourage in depth investigation approximately 250 full colour photos and drawings This encyclopedia is one of a series of four major reference books new in paperback Each volume is separate in itself together they form a fascinating library of knowledge Oxford Children's Maths and Science Words Oxford Dictionaries,2021-07 The Oxford Children s Maths and Science Words includes more than 600 first science and maths words as well as computing words explained clearly and in alphabetical order Matched to the curriculum it is full of colourful illustrations and simple definitions to make learning new words fun and easy Representations of Technology in Science Fiction for Young People Noga Applebaum,2009-09-10 In this new book Noga Applebaum surveys science fiction novels published for children and young adults from 1980 to the present exposing the anti technological bias existing within a genre often associated with the celebration of technology Applebaum argues that perceptions of technology as a corrupting force particularly in relation to its use by young people are a manifestation of the enduring allure of the myth of childhood innocence and result in young adult fiction that endorses a technophobic agenda This agenda is a form of resistance to the changing face of childhood and technology s contribution to this change Further Applebaum contends that technophobic literature disempowers its young readers by implying that the technologies of the future are inherently dangerous while it neglects to acknowledge children s complex yet pleasurable interactions with technology today The study looks at works by well known authors including M T Anderson Monica Hughes Lois Lowry Garth Nix and Philip Reeve and explores topics such as ecology cloning the impact of technology on narrative structure and the adult child hierarchy While focusing on the popular genre of science fiction as a useful case study Applebaum demonstrates that negative attitudes toward technology exist within children s literature in general making the book of considerable interest to scholars of both science fiction and children s literature **Oxford Children's Encyclopedia of Science** ,1992 **The SAGE Handbook of Child Research** Gary B Melton,Asher Ben-Arieh,Judith Cashmore,Gail S. Goodman,Natalie K. Worley,2013-12-18 It is refreshing to see a book such as this which is both broad in its conceptualization of the field of child research and deep in its focus The volume s editors are paragons of awareness when it comes to the need for interdisciplinary research and theory to illuminate the lives and experience of children James Garbarino Loyola University Chicago Covers a satisfying and unprecedentedly wide range of research relating to childhood The contributors include many eminent international scholars of childhood making the book a valuable resource for child researchers Child advocates will also find the book to be invaluable in their efforts to improve children s well being and to change policies and practices for the better Anne Smith University of Otago A really scintillating collection that will provide a lasting perspective on child studies stimulating and comprehensive Jonathan Bradshaw University of York In keeping with

global changes in children's social and legal status this Handbook includes examination of children as family members friends learners consumers people of faith and participants in law and politics The contributors also discuss the methodological and ethical requirements for research that occurs in natural settings and that enables children themselves to describe their perspective The book is divided into three parts Part I Setting Specific Issues in Child Research Part II Population Specific Issues in Child Research Part III Methods in Research on Children and Childhood

Being Participatory: Researching with Children and Young People Imelda Coyne, Bernie Carter, 2024-03-20 The second edition of this book provides a clear framework for conducting participatory research with children and young people supported by practical examples from international research studies Our aim is to encourage more participatory research with children and young people on all matters that affect their lives This book illustrates innovative ways of being participatory and how such methods can promote the inclusion of children and young people with diverse experiences and backgrounds It sheds new light on involvement strategies that recognise agency and that play to children and young people's strengths The international experts in this book share knowledge built from their wealth of experience in undertaking participatory research with children and young people using creative techniques that can enable and promote ways of expressing their views and experiences The book provides guidance on appropriate techniques that can reduce the power differential between adult researchers and children and young people as participants These techniques help to optimise their abilities to participate in research There is increasing interest in involving children and young people as co-researchers but little guidance on how this can be done This book fills a gap in the current literature by addressing all these issues outlined above and by providing worked examples from leading researchers and academics Building on the success of the first edition and with an additional three chapters this second edition is sure to have wide appeal to researchers across a range of different disciplines This book is targeted at researchers academics and practitioners who need guidance on what tools are available how the tools can be used advantages and challenges and how best to involve children and young people in all stages of a research project

Engaging Youth in Activism, Research and Pedagogical Praxis Tamara Shefer, Jeff Hearn, Kopano Ratele, Floretta Boonzaier, 2018-06-14 Engaging Youth in Activism Research and Pedagogical Praxis Transnational and Intersectional Perspectives on Gender Sex and Race offers critical perspectives on contemporary research and practice directed at young people across the global north and south Drawing upon pedagogical programmatic and activist work with respect to challenging inequalities and injustices for young people the authors interrogate the dominant discourses of sexuality gender race class age and other social categories Emerging out of a Finnish South African collaboration this volume does not take a comparative approach but rather a transnational one by embracing the intersections of local and global knowledges We draw on this transnational and transdisciplinary framework and these various contexts to generate a critique of mainstream theory and pedagogical practice as well as to subvert and disrupt such research and practice so as to speak
