

The background image is a dramatic, high-contrast scene. It appears to be a close-up of a ship's mast and rigging, possibly from a sailing ship, set against a dark, turbulent sky. A bright, glowing light source, likely the sun or moon, is visible on the right side, creating a strong silhouette effect and illuminating the rigging. The overall mood is intense and atmospheric.

The Ozone War:

The Ozone War Lydia Dotto, Harold Schiff, 1978 Atmospheric Science at NASA Erik M. Conway, 2008-11-03

Honorable Mention 2008 ASLI Choice Awards Atmospheric Science Librarians International This book offers an informed and revealing account of NASA's involvement in the scientific understanding of the Earth's atmosphere. Since the nineteenth century, scientists have attempted to understand the complex processes of the Earth's atmosphere and the weather created within it. This effort has evolved with the development of new technologies from the first instrument equipped weather balloons to multibillion dollar meteorological satellite and planetary science programs. Erik M. Conway chronicles the history of atmospheric science at NASA, tracing the story from its beginnings in 1958, the International Geophysical Year, through to the present, focusing on NASA's programs and research in meteorology, stratospheric ozone depletion, and planetary climates and global warming. But the story is not only a scientific one. NASA's researchers operated within an often politically contentious environment. Although environmental issues garnered strong public and political support in the 1970s, the following decades saw increased opposition to environmentalism as a threat to free market capitalism. Atmospheric Science at NASA critically examines this politically controversial science, dissecting the often convoluted roles, motives, and relationships of the various institutional actors involved among them: NASA, congressional appropriation committees, government weather and climate bureaus, and the military.

Merchants of Doubt Naomi Oreskes, Erik M. Conway, 2010-06-03 The U.S. scientific community has long led the world in research on such areas as public health, environmental science, and issues affecting quality of life. Our scientists have produced landmark studies on the dangers of DDT, tobacco smoke, acid rain, and global warming. But at the same time, a small yet potent subset of this community leads the world in vehement denial of these dangers. *Merchants of Doubt* tells the story of how a loose knit group of high level scientists and scientific advisers with deep connections in politics and industry ran effective campaigns to mislead the public and deny well established scientific knowledge over four decades. Remarkably, the same individuals surface repeatedly, some of the same figures who have claimed that the science of global warming is not settled, denied the truth of studies linking smoking to lung cancer, coal smoke to acid rain, and CFCs to the ozone hole. Doubt is our product, wrote one tobacco executive. These experts supplied it. Naomi Oreskes and Erik M. Conway, historians of science, roll back the rug on this dark corner of the American scientific community, showing how ideology and corporate interests, aided by a too compliant media, have skewed public understanding of some of the most pressing issues of our era.

Beyond Resource Wars Shlomi Dinar, 2011-03-18 An argument that resource scarcity and environmental degradation can provide an impetus for cooperation among countries. Common wisdom holds that the Earth's dwindling natural resources and increasing environmental degradation will inevitably lead to inter-state conflict and possibly even set off resource wars. Many scholars and policymakers have considered the environmental roots of violent conflict and instability, but little attention has been paid to the idea that scarcity and

degradation may actually play a role in fostering inter state cooperation Beyond Resource Wars fills this gap offering a different perspective on the links between environmental problems and inter state conflict Although the contributors do not deny that resource scarcity and environmental degradation may become sources of contention they argue that these conditions also provide the impetus for cooperation coordination and negotiation between states The book examines aspects of environmental conflict and cooperation in detail across a number of natural resources and issues including oil water climate change ocean pollution and biodiversity conservation The contributors argue that increasing scarcity and degradation generally induce cooperation across states but when conditions worsen and a problem becomes too costly or a resource becomes too scarce cooperation becomes more difficult Similarly low levels of scarcity may discourage cooperation because problems seem less urgent With contributions from scholars in international relations economics and political science Beyond Resource Wars offers a comprehensive and robust investigation of the links among scarcity environmental degradation cooperation and conflict

The Internationalization of Environmental Protection Miranda A.

Schreurs,Elizabeth Economy,1997-10-02 Exploring the intersection of the domestic and the international in environmental politics this book presents seven original case studies which show how the internationalization of environmental protection efforts is altering policy making processes policy outcomes and the effectiveness of policy implementation The authors argue that while new norms and institutions for the global environment are emerging which are changing policy making processes at the national and regional levels sub state politics continues to influence strongly the nature of national responses to international environmental problems The volume examines climate change politics in China Japan and Germany ozone layer protection in the United States United Kingdom Japan and Germany East West environmental cooperation and the former Soviet Union Zimbabwe and the Convention on International Trade in Endangered Species biodiversity politics in the United States and United Kingdom and environmental protection within the European Union
