Soviet Submarines:

Cold War Submarines Norman Polmar, Kenneth J. Moore, 2004 Submarines had a vital if often unheralded role in the superpower navies during the Cold War. Their crews carried out intelligence collection operations sought out and stood ready to destroy opposing submarines and from the early 1960s threatened missile attacks on their adversary's homeland providing in many respects the most survivable nuclear deterrent of the Cold War. For both East and West the modern submarine originated in German U boat designs obtained at the end of World War II. Although enjoying a similar technology base by the 1990s the superpowers had created submarine fleets of radically different designs and capabilities. Written in collaboration with the former Soviet submarine design bureaus Norman Polmar and K J Moore authoritatively demonstrate in this landmark study how differing submarine missions antisubmarine priorities levels of technical competence and approaches to submarine design organizations and management caused the divergence **Soviet Submarines** Jan S. Breemer, 1989

Soviet Cold War Attack Submarines Edward Hampshire, 2020-09-17 In this highly detailed book naval historian Edward Hampshire reveals the fascinating history of the nuclear powered attack submarines built and operated by the Soviet Union in the Cold War including each class of these formidable craft as they developed throughout the Cold War period. The November class which were the Soviet Union's first nuclear submarines had originally been designed to fire a single enormous nuclear tipped torpedo but were eventually completed as boats firing standard torpedoes. The Alfa class were perhaps the most remarkable submarines of the Cold War titanium hulled which was light and strong but extremely expensive and difficult to weld successfully crewed with only thirty men due to considerable automation and 30% faster than any US submarines they used a radical liquid lead bismuth alloy in the reactor plant. The Victor class formed the backbone of the Soviet nuclear submarine fleet in the 1970s and 1980s as hunter killer submarines began to focus on tracking and potentially destroying NATO ballistic missile submarines. The Sierra classes were further titanium hulled submarines and the single Mike class submarine was an experimental type containing a number of innovations. Finally the Akula class were being constructed as the Cold War ended and these boats form the mainstay of the Russian nuclear attack submarine fleet today. This book explores the design development and deployment of each of these classes in detail offering an unparalleled insight into the submarines which served the Soviet Union throughout the Cold War period. The text is supported by stunning illustrations photographs and diagrams of the submarines *The Soviet Navy* Bruce W. Watson, Susan M Watson, Calland Carnes, Brian Larson, 2020-01-09 Since Admiral Sergei G Gorshkov was appointed to the office of commander in chief of the Soviet Navy in 1956 the Soviet Union has made a massive investment in naval construction training and operations. As a result the Soviet Navy has grown from a coastal defense force to one of the world's two strongest navies. This book offers a detailed assessment of every major aspect of the Soviet Navy from fleet structure and training facilities to command and control procedures and warfare and intelligence collection capabilities *Stalin's Ocean-going Fleet: Soviet* Jurgen

Rohwer,2017-07-05 In this work two senior naval historians analyze the discussions held in leading Soviet political military and naval circles concerning naval strategy and the decisions taken for warship building programmes They describe the reconstitution of the fleet under difficult conditions from the end of the Civil War up to the mid 1920s leading to a change from classical naval strategy to a Jeune ecole model in the first two Five Year Plans including efforts to obtain foreign assistance in the design of warships and submarines Their aim is to explain the reasons for the sudden change in 1935 to begin building a big ocean going fleet After a period of co operation with Germany from 1939 41 the plans came to a halt when Hitler attacked the Soviet Union in 1941 Finally this work covers the reopening of the naval planning processes in 1944 and 1945 and the discussions of the naval leadership with Stalin the party and government officials about the direction of the new building programmes as the Cold War began **Stalin's Ocean-going Fleet** Mikhail Monakov,Jurgen

Rohwer,2012-11-12 A study of the development of strategic concepts in Stalin s Navy in the context of his foreign defence policy using original archival documents translated from the Russian *Submarine Operational Effectiveness in the 20th Century* Captain John F. O'Connell, USN (RET.),2011-08-18 The submarine emerged as a serious weapons system during the First World War 1914 1918 During that conflict Germany with its unrestricted submarine warfare campaign of 1917 nearly drove Great Britain to the negotiating table Its U boats sank 6 196 ships of 13 438 632 gross register tons Despite post war attempts to ban the submarine from warfare it survived Both Italy and Germany used submarines covertly during the Spanish Civil War 1936 1939 This book Part Two of a series discusses the use of submarines during World War Two 1939 1945 and their effectiveness It focuses principally on two strategic submarine campaigns The first is about German U boats against British and neutral commerce That campaign finally failed during the Battle of The Atlantic in 1943 The second deals with American submarines against Japanese shipping from Southeast Asia to the home islands a campaign that successfully isolated Japan from its sources of raw materials and foodstuffs during 1944 and effectively defeated Japan **Soviet Cruise**

Missile Submarines of the Cold War Edward Hampshire,2018-07-26 The Soviet Union s cruise missile submarines from the modified Whiskey to the Oscar II classes were among the most formidable vessels of the Cold War They were initially designed to carry land attack nuclear tipped cruise missiles designed to strike targets on the eastern coast of the United States By the late 1960s however submarine launched ballistic missiles made the nuclear land attack mission unnecessary so existing classes were converted to the carrier killer role armed with anti ship cruise missiles designed to destroy US super carriers and other important naval targets This fully illustrated study examines these powerful machines that were some of the largest and fastest submarines ever built If war had broken out they would have been at the forefront of the Soviet Navy s campaign to destroy NATO s sea power and cut America s sea link with Europe *The Royal Navy in the Cold War Years, 1966-1990* Edward Hampshire,2024-07-30 During the period covered by this new book the Royal Navy faced some of its greatest challenges both at sea confronting the increasingly capable and impressive Soviet Navy and on shore when it faced

policy crises that threatened the survival of much of the fleet During this remarkable period the Navy had rarely been so focussed on a single theater of war the Eastern Atlantic but also rarely so politically vulnerable The author sets out to analyze shadowing operations and confrontations at sea with Soviet ships and submarines the Navy s role in the enormous NATO and Warsaw Pact naval exercises that acted out potential war scenarios individual operations from the Falklands and the 1990 91 Gulf War to the Beira and Armilla patrols the development of advanced naval technologies to counter Soviet capabilities policy making controversies as the three services fought for resources including the controversial 1981 Nott defense review and what life was like in the Cold War navy for ratings and officers The book the first to cover this subject in depth for more than thirty years will make use of the full range of archival sources that have been publicly available over the last two decades but of which little use has been made by historians This work is destined to become a definitive naval history of the period and also provide a fascinating and gripping narrative of a navy under threat from many directions but which survived and eventually prospered winning a remarkable victory in the far South Atlantic more than 7 000 miles from its expected battleground in the North Atlantic Elegantly written for a wide audience it will be a very significant volume for professional and enthusiast alike

The Submariner's Dictionary Or Submariner's Compendium of Terms & Tar's Handbook of Naval Verbiage and Retired Guy's Re-familiarization Manual Ron Martini,2005 Submariners are a tight knit group of men bound together by training and experience and with a language all their own That language is perhaps a little vulgar but never intentionally demeaning and a little irreverent but still worldly This work is an attempt to preserve and explain some of these curious guys who so proudly wear a shiny metal pin that looks like a strange pair of fish on their left breast This process of accumulating this new language begins in Boot Camp and is added to with every change of duty station the sailor undergoes It is heard aboard the boats and unknowingly by family members who can t understand terms like head deck and overhead and who think SOS is a distress signal
