**Energizing Water** Jochen

Schwuchow,John Wilkes,Iain Trousdale,2013-04-16 The poor quality of water as well as its restricted supply and availability is

one of the biggest challenges of our time with presently two fifth s of the world s population unable to find adequate fresh water for essential usage Over 40 years research has been carried out on the positive effects that rhythms and specific water flow has on water s capacity to support life Energizing Water presents this cutting edge research to the general and

professional reader at a time when interest in finding solutions to water s huge worldwide problems is growing rapidly Three aspects determine water quality its chemical constituents including its oxygen levels its organic aspects with the danger of contamination by effluent pathogens and algae and its energetic nature The latter facet has been recognized from time

immemorial by traditional societies who have developed their own sciences in relation to water quality using terms such as prana and chi for energy Now through the introduction of quantum physics into the life sciences modern science is beginning

to accept this concept measuring energy as light emission Research into energetic water quality and particularly into the creation of moulded surfaces that support biological purification of the chemical and organic elements as well as enlivening the energetic attributes goes back to George Adams and John Wilkes pioneering work in the 1960s The invention of Flowform

technology in 1970 carried this research further providing the world with one of the first modern day biomimicry eco technologies This creative technology applies nature s best methods to produce extraordinary results and this book outlines the background story on research and application of the Flowform method today JOHN WILKES originated the Flowform

Method in 1970 following periods of work with George Adams and Theodor Schwenk After further research project work led to installations in many countries In 2002 an Institute was built at Emerson College providing more adequate space for

research into the qualitative effects of rhythmic movement on water JOCHEN SCHWUCHOW is a freelance research and

teaching consultant at Emerson College in England IAIN TROUSDELL is director of the Healing Water Institute in NZ

*The Astrological Revolution* Robert A. Powell,Kevin Dann,2010-10 Like the prostrate pilgrim on the front cover with his

head protruding through the vault of heaven to discern the working of the cosmos humanity has for many centuries employed astrology to penetrate the mystery of the stars relationship to human destiny Based on decades of research into both

astrological reincarnation and the history of astronomy astrology The Astrological Revolution unfolds this mystery The reader

is invited to call into question the basis of modern astrology. This basis the tropical zodiac emerged through Greek astronomers from what was originally a calendar dividing the year into twelve solar months. The fact that ninety eight percent of Western astrologers use the tropical zodiac means that contemporary Western astrology is based on a calendar system that does not reflect the actual location of the planets against the background of the starry heavens. In other words most astrologers in the West are practicing a form of astrology that no longer embodies the reality of the stars. What is needed to bring astrology which means the science of the stars back into alignment with the stars in the heavens. The first step in an astrological revolution that leads to true astrology is to recognize the sidereal zodiac sidereal meaning related to the stars. In antiquity the Babylonians Egyptians Greeks Romans and Hindus used the sidereal zodiac and today Hindu Vedic astrologers still use the sidereal zodiac. Based on recognition through the newly discovered rules of astrological reincarnation that the sidereal zodiac presents an authentic astrological zodiac a new practice of astrology is possible that offers tools to reestablish a wisdom filled astrology in the modern world. This new astrology based on the sidereal zodiac is similar to the classic sidereal form but in a modern form as that practiced by the three magi who prompted by the stars journeyed to Bethlehem two thousand years ago. Drawing on specific biographical examples The Astrological Revolution reveals new understandings of how the starry heavens work into human destiny. For instance the book demonstrates the newly discovered rules of astrological reincarnation through the previous incarnations of composer Franz Schubert and his patron Joseph von Spaun respectively the Sultan of Morocco Abu Yusuf Ya qub and his erstwhile enemy Alfonso X the Castilian King known as El Sabio the Learned along with their sidereal horoscopes. Rudolf Steiner's biography is also considered in relation to the sidereal zodiac and the rules of astrological reincarnation. After reestablishing the sidereal zodiac as a basis for astrology that penetrates the mystery of the stars relationship to human destiny the reader is invited to discover the astrological significance of the totality of the vast sphere of stars surrounding the Earth. The Astrological Revolution points to the astrological significance of the entire celestial sphere including all the stars and constellations beyond the twelve zodiacal signs. This discovery is revealed by studying the megastars the most luminous stars of our galaxy illustrating how megastars show up in an extraordinary way in Christ's healing miracles by aligning with the Sun at the time of those miraculous events. The Astrological Revolution thus offers a spiritual yet scientific path of building a new relationship to the stars. Subtle Agroecologies Julia Wright, 2021-06-29 This book is about the invisible or subtle nature of food and farming and also about the nature of existence. Everything that we know and do not know about the physical world has a subtle counterpart which has been scarcely considered in modernist farming practice and research. If you think this book isn't for you if it appears more important to attend to the pressing physical challenges the world is facing before having the luxury of turning to such subtleties then think again. For it could be precisely this worldview the one prioritises the physical material dimension of reality that helped get us into this situation in the first place. Perhaps we need a different worldview to get us out. This book

makes a foundational contribution to the discipline of Subtle Agroecologies a nexus of indigenous epistemologies multidisciplinary advances in wave based and ethereal studies and the science of sustainable agriculture Not a farming system in itself Subtle Agroecologies superimposes a non material dimension upon existing materially based agroecological farming systems Bringing together 43 authors from 12 countries and five continents from the natural and social sciences as well as the arts and humanities this multi contributed book introduces the discipline explaining its relevance and potential contribution to the field of Agroecology Research into Subtle Agroecologies may be described as the systematic study of the nature of the invisible world as it relates to the practice of agriculture and to do this through adapting and innovating with research methods in particular with those of a more embodied nature with the overall purpose of bringing and maintaining balance and harmony Such research is an open minded inquiry its grounding being the lived experiences of humans working on and with the land over several thousand years to the present By reclaiming and reinterpreting the perennial relationship between humans and nature the implications would revolutionise agriculture heralding a new wave of more sustainable farming techniques changing our whole relationship with nature to one of real collaboration rather than control and ultimately transforming ourselves

**Food Full of Life** Gill Bacchus,2012-08-30 Is organic and biodynamic food worth the higher price consumers often pay Which aspects of us are nourished by the food we eat How can different methods of growing and cooking food best preserve the life energies in our food In recent years there has been a growing awareness of the quality of the food we eat allied to a mistrust of many aspects of large scale agri industry In response to these concerns many consumers turned towards buying organic or biodynamic produce Our current financial climate makes those buying decisions difficult for many people Organic food is often more expensive and tests by conventional scientists claim to show that it has no extra nutritional value This book questions whether these claims have any basis Gill Bacchus concludes that modern scientific methods simply cannot reveal or measure the true life processes that give quality to our food Exploring ideas from organics and Rudolf Steiner's biodynamics the author discusses how the Earth's formative energies especially sunlight are essential to the healthy life of plants and animals The living energy in our food is either enhanced or destroyed by our chosen methods of farming processing and cooking She argues that the health not only of our bodies but also of our consciousness thinking and emotions depends on nourishing ourselves wisely and gives advice on how we can learn to find and choose food that is full of life and light

**Conscious Food** Jim Pathfinder Ewing,2012-09-01 When did growing and eating food cease to be considered sacred How did food lose its connection with health Why is our food system out of control What simple steps can we each take to profoundly change our world as a healthier place for us all Journalist author Jim Pathfinder Ewing answers these and other questions with his new book Conscious Food Sustainable Growing Spiritual Eating Ewing provides a background on the emergence of agriculture and the declining connection with food as society evolved particularly during times of war and scrutinizes today's conventional farming that relies upon deadly toxins and

unsustainable fossil fuels The book outlines how modern people can avoid being victims of biocultural evolution and the resultant entropy of declining global and personal health and instead contribute to the movement toward mindful food choices and better world health both physically and spiritually Ewing discusses how society can nurture the unseen Spirit world that permeates plants through adopting nondenominational spiritual understandings and includes how to examples for growing organic food and fostering a supportive community and urban agriculture as well as notes for expanded resources
