## **Soviet Intentions:**

The Intelligence Intellectuals Peter C. Grace, 2026-01-05 The untold story of how America's brightest academic minds revolutionized intelligence analysis at the CIA. In the early days of the Cold War the United States faced a crisis in intelligence analysis. A series of intelligence failures in 1949 and 1950 including the failure to warn about the North Korean invasion of South Korea made it clear that gut instinct and traditional practices were no longer sufficient for intelligence analysis in the nuclear age. The new director of the Central Intelligence Agency Walter Bedell Smith had a mandate to reform it. Based on new archival research in declassified documents and the participants personal papers The Intelligence Intellectuals reveals the neglected history of how America's brightest academic minds were recruited by the CIA to revolutionize intelligence analysis during this critical period. Peter C Grace describes how the scientifically sound analysis methods that they introduced significantly helped the United States gain an advantage in the Cold War and these new analysts legitimized the role of the recently created CIA in the national security community. Grace demonstrates how these professors such as William Langer from Harvard Sherman Kent from Yale and Max Millikan from MIT developed systematic approaches to intelligence analysis that shaped the CIA's methodology for decades to come. Readers interested in the history of the Cold War and in intelligence scholars of intelligence studies Cold War historians and intelligence practitioners seeking to understand their craft's foundations will all value this insightful history about the place of social science in national security.

**Cross-Domain Deterrence** Erik Gartzke, Jon R. Lindsay, 2019-02-01

Deterrence theory which emerged during the Cold War explains how states can use nuclear threats to prevent nuclear war. Today however the threat landscape is significantly more complex. Alongside ever more sophisticated nuclear weapons arsenals contemporary threats include cyberwarfare, anti satellite weapons, robotic drones and advanced conventional weapons. To deal with the new threat environment the Pentagon identified five operational domains land, sea, air, space and cyberspace. The resulting model is an integrated flexible regime that is able to deter threats across domains. In this volume a
