Space Technology Joseph A. Angelo, 2003-06-30 A reference guide to current developments in space technology that discusses the social political and technical impacts of those developments on everyday life both now and in the future

NRL Review, 1991 **Handbook of Space Technology** Wilfried Ley, Klaus Wittmann, Willi Hallmann, 2009-03-18

Twenty years since the first edition was published in the German language and just over fifty years since the launch of the Earth's first ever artificial satellite Sputnik 1 this third edition of the Handbook of Space Technology presents in fully integrated colour a detailed insight into the fascinating world of space for the first time in the English language Authored by over 70 leading experts from universities research institutions and the space industry this comprehensive handbook describes the processes and methodologies behind the development construction operation and utilization of space systems presenting the profound changes that have occurred in recent years in the engineering materials processes and even politics associated with space technologies and utilization The individual chapters are self contained enabling the reader to gain a quick and reliable overview of a selected field an extensive reference and keyword list helps those who wish to deepen their understanding of individual topics Featuring superb full colour illustrations and photography throughout this interdisciplinary reference contains practical hands on engineering and planning information that will be invaluable to those on a career path within space technology or simply for those of us who'd like to know more about this fascinating industry Main section headings include Introduction historical overview space missions Fundamentals orbital mechanics aerothermodynamics reentry space debris Launch Vehicles staged technologies propulsion systems launch infrastructure Space Vehicle Subsystems structure energy supply thermal controls attitude control communication Aspects of Human Flight man in space life support systems rendezvous and docking Mission Operations satellite operation control center ground station network Utilization of Space Earth observation communication navigation space astronomy material sciences space medicine robotics Configuration and Design of a Space Vehicle mission concept system concept environmental simulation system design Galileo satellites Management of Space Missions project management quality management cost management space law **Scientific and Technical Aerospace Reports**, 1986 Handbook of Space Technology: Status and Projections R. Michael Hord, 2019-08-08 This book presents current and anticipated quantitative values for a wide range of critical figures of merit which characterize technological capabilities in the major discipline areas of space technology The projections are based on historical data and the considered opinions of knowledgeable experts in government and industry who are active contributors in their respective fields 宇宙空間 (Japan), 197? **America's Space Sentinels** Jeffrey Richelson, 1999 During much of the Cold War America's first line of defense was in outer space a network of secret satellites that could provide instant warning of an enemy missile launch The presence of these infrared sensors orbiting 22 000 miles above the earth discouraged a Soviet first strike and stabilized international relations between

the superpowers and they now play a crucial role in monitoring the missile programs of China India and other emerging nuclear powers Jeffrey Richelson has written the first comprehensive history of this vital program tracing its evolution from the late 1950s to the present He puts Defense Support Program operations in the context of world events from Russian missile programs to the Gulf War and explains how DSP s infrared sensors are used to detect meteorites monitor forest fires and even gather industrial intelligence by seeing the lights of steel mills *Aircraft Year Book* Fay Leone Faurote,1959

Space Technology & Planetary Astronomy Joseph N. Tatarewicz,1990 the book reminds us of an important lesson in the postwar era of big science that government policy may lead initially to tremendous support for various fields of science and technology Science a triumph of historical analysis Choice This is an excellent record of the beginnings of the NASA planetary astronomy program in the years 1958-70 American Historical Review The historical circumstances that led to this country s great leap into space were unique but it is clear that there are many lessons to be learnt from this enthralling tale and Tatarewicz tells the tale well Annals of Science When NASA went looking for expertise on the moon and planets following Sputnik they found that astronomers had long since turned their telescopes away from our planets and toward the stars Where were the scientists who could help the United States explore the solar system The answer as this important new study shows was that NASA had to create them This story of the precipitous rise and decline of planetary astronomy is an important case study of science in an age of state managed research and development It demonstrates that the lines between science technology politics and society are anything but fixed and impermeable Western Aerospace ,1959 **Single Stage to Orbit** Andrew J. Butrica,2003-10-22 While the glories and tragedies of the space shuttle make headlines and move the nation the story of the shuttle forms an inseparable part of a lesser known but no less important drama the search for a reusable single stage to orbit rocket Here an award winning student of space science Andrew J Butrica examines the long and tangled history of this ambitious concept from its first glimmerings in the 1920s when technicians dismissed it as unfeasible to its highly expensive heyday in the midst of the Cold War when conservative backed government programs struggled to produce an operational flight vehicle Butrica finds a blending of far sighted engineering and heavy handed politics To the first and oldest idea that of the reusable rocket powered single stage to orbit vehicle planners who belonged to what President Eisenhower referred to as the military industrial complex added experimental X aircraft like capabilities and eventually a faster cheaper smaller managerial approach Single Stage to Orbit traces the interplay of technology corporate interest and politics a combination that well served the conservative space agenda and ultimately triumphed not in the realization of inexpensive reliable space transport but in a vision of space militarization and commercialization that would appear settled United States policy in the early twenty first century D M Ashford *The Air & Space Catalog* Joel Makower,1989 A comprehensive sourcebook to air and space Arranged in four sections astronomy weather space flight and aviation **AIAA 1995 Space Programs and Technologies Conference** ,1995 *Counterculture Green* Andrew G.

Kirk,2007 For many it was more than a publication it was a way of life The Whole Earth Catalog billed itself as Access to Tools and it grew from a Bay Area blip to a national phenomenon catering to hippies do it yourselves and anyone interested in self sufficiency independent of mainstream America now known as living off the grid In recovering the history of the Catalog s unique brand of environmentalism historian Kirk recounts how Stewart Brand and the Point Foundation promoted a philosophy of pragmatic environmentalism that celebrated technological achievement human ingenuity and sustainable living Kirk shows us that Whole Earth was more than a mere counterculture fad At a time when many of these ideas were seen as heretical to a predominantly wilderness based movement it became a critical forum for environmental alternatives and a model for how complicated ecological ideas could be presented in a hopeful and even humorous way From publisher description **Red Spies in America** Katherine Amelia Siobhan Sibley,2004 The most detailed study of Soviet military industrial espionage during the 1930s 1940s and 1950s spying aimed specifically at acquiring restricted information and materials relating to American industry technology and science Beijing Review ,2002 *Western Aviation, Missiles, and Space* ,1963 **ITA Magazine** ,1986 Illinois Technograph ,1959 **Ideas, Concepts, Doctrine** Robert Frank Futrell,1989
