The Big Bite Of Sandwiches The Big Bite Series:

The Syntax of V-V Resultatives in Mandarin Chinese Jianxun Liu, 2021-03-01 This book addresses the three fundamental properties of V V resultative constructions in Mandarin Chinese their generation their syntactic structure and their alternations This book is original and new in the following aspects First adopting the inner vs outer domain theory it provides new analysis and evidence that these compounds are generated in syntax not in lexicon Second this book argues that the two subclasses of V V resultative constructions object oriented vs subject oriented V V resultatives actually have different structures Their syntactic contrasts have not been observed in the literature before Third this book is new in determining the syntactic structure of the V V resultative constructions through their adverbial modification properties It demonstrates that the previous isomorphism analysis of the syntactic structure of Chinese V V resultatives does not hold Finally this book provides a new analysis of the issue of the alternations of V V resultatives In contrast to previous analyses which generally view the causative alternation as the idiosyncratic property of particular V V compounds this book provides a principled analysis This book makes a substantial improvement of the current understanding of the issues in the syntax of Mandarin Chinese and gives new support to certain theories of the generative grammar from the perspective of Mandarin Chinese
