Working as Indigenous Archaeologists George Nicholas, Joe Watkins, 2024-09-30 Working as Indigenous Archaeologists explores the often contentious relationship between Indigenous and other formerly colonized peoples and Archaeology through their own voices Over the past 35 plus years the once novel field of Indigenous Archaeology has become a relatively familiar part of the archaeological landscape It has been celebrated criticized and analyzed as to its practical and theoretical applications and its political nature No less important are the life stories of its Indigenous practitioners What has brought some of them to become practicing archaeologists or heritage managers What challenges have they faced from both inside and outside their communities And why haven't more pursued Archaeology as a vocation or avocation This volume is a collection of 60 autobiographical chapters by Indigenous archaeologists and heritage specialists from around the world some community based some academic some in other realms who are working to connect past and present in meaningful and especially personal ways As Archaeology continues to evolve there remain strong tensions between an objective science oriented evidentiary based approach to knowing the past and a more subjective relational humanistic approach informed by local values traditional knowledge and holistic perspective While there are no maps for these new territories hearing directly from those Indigenous individuals who have pursued Archaeology reveals the pathways taken Those stories will provide inspiration and confidence for those curious about what lies ahead This is an important volume for anyone interested in the present state and future of the archaeological discipline

Exchange and Markets in Early Economic Development John D. Conroy, 2023-05-12 The idea of an informal economy emerged from and is a critique of the ideology of economic development It originated from Keith Hart's recognition of informal economic activity in 1960s Ghana In the context of four colonialisms German British Australian and Dutch this book recounts Hart's effort in 1972 to introduce the informal sector into development planning in Papua New Guinea This was problematic because the market was scarcely institutionalized and traditional modes of exchange persisted stubbornly Rather than conforming with post colonial economic ideology the subjected people pushed back against imposed bureaucracy to practice informal and hybrid modes of economic activity
