The Impacts of Biofuels on the Economy, Environment, and Poverty Govinda R. Timilsina, David Zilberman, 2014-05-20 Interest in biofuels began with oil shocks in the 1970s but the more rapid development and consumption of biofuel industry in recent years has been primarily driven by mandates subsidies climate change concerns emissions targets and energy security. From 2004 to 2006 fuel ethanol grew by 26% and biodiesel grew by 172%. As biofuel production continues to expand investments in capacity expansion and research and development have been made. The 2008 food crisis emphasized the need to re-examine biofuel consequences. Biofuels remain an important renewable energy resource to substitute for fossil fuels particularly in the transportation sector yet biofuels success is still uncertain. The future of biofuels in the energy supply mix relies on mitigating potential and improving the environmental gains. This book brings together leading authorities on biofuel from the World Bank to examine all of the impacts of biofuel economic social environmental within a unified framework and in a global perspective making it of interest to academics in agricultural and environmental economics as well as industry and policy makers
