Story Of Biochemistry:

A History of Biochemistry Marcel Florkin,1972 *The Chemistry of Life* Joseph Needham,1970-04 This assembly of lectures should appeal to anyone with an interest in the history of science and the nature of living things Seven of the eight lectures are by eminent biochemists and describe the development of their own subject from the inside the eighth is a more general one

Selected Topics in the History of Biochemistry G. Semenza,A.J. Turner,2003-04-01 This book is the latest volume in a highly successful series within Comprehensive Biochemistry and provides a historical and autobiographical perspective of the development of the field through the contributions of leading individuals who reflect on their careers and their impact on biochemistry The book is essential reading for everybody from graduate student to professor placing in context major advances not only in biochemical terms but in relation to historical and social developments Readers will be delighted by the lively style and the insight into the lives and careers of leading scientists of their time

The Chemistry of Life Robert Hill,1970 Selected Topics in the History of Biochemistry. Personal Recollections. IV G. Semenza,E.C.

Slater,R. Jaenicke,2012-12-02 The editors invited selected authors who had participated in or observed developments in biochemistry and molecular biology particularly in the second half of this century to record their personal recollections of the times and circumstances in which they worked Having been given free reign both content and style of the contributions reflect the flavour of the personality of the author The book reflects the explosive development of biochemistry and molecular biology and related sciences that had led to the almost unique situation of these fields coming of age at a time when their founding fathers or their scientific children were alive and well The contributions in this volume encompass a wide variety of experiences in many different countries and in very different fields of biochemistry

Selected Topics in the History of Biochemistry G. Semenza,2012-12-02 One of the most exciting developments in biological sciences has been their merging with chemistry and physics resulting in the new disciplines of biochemistry biophysics and molecular biology As the developments of these new disciplines has been so rapid many of the key discoveries have occurred within the life time of a number of prominent scientists in the field The chapters in this and in future volumes are meant to complement with personal recollections by these scientists the History of Biochemistry in this series vols 30 33 by M Florkin and Vol 34 by P Laszlo These bibliographic and autobiographic chapters convey to the reader lively albeit at times subjective views on both the scientific and social

environments of the authors The editor cosidered it presumptuous to give the authors narrow guidelines or to suggest changes in the chapters he received The contributions assembled in this volume will convey the flavour of each author s particular personality The Story of Biochemistry Justine Glass,1964 Selected Topics in the History of Biochemistry G. Semenza,A.J. Turner,2003-04-15 This book is the latest volume in a highly successful series within Comprehensive Biochemistry and provides a historical and autobiographical perspective of the development of the field through the contributions of leading individuals who reflect on their careers and their impact on biochemistry The book is essential reading for everybody from graduate student to professor placing in context major advances not only in biochemical terms but in relation to historical and social developments Readers will be delighted by the lively style and the insight into the lives and careers of leading scientists of their time **History of Development of Biochemistry and Molecular Biology in India** ,1996 Contributed research papers presented in two symposiums one named Symposium on History of Biochemistry and Molecular Biology in India dedicated to the 80th birthday of Prof Sushil Kumar Mukherjee on 8th Feb 1993 held at Varanasi India

The Story of Biochemistry Alice Enid Corrall,1964 **Text Book of Biochemistry** , A *Documentary History of Biochemistry, 1770-1940* Mikuláš Teich,Dorothy Mary Needham,1992 This volume covers the period from the beginning of biochemistry in the work of Priestley and Lavoisier to its final flourish before the new science of molecular biology split from it in the 1940s *Selected Topics in the History of Biochemistry. Personal Recollections.* V G. Semenza,R. Jaenicke,1997-07-24 The Editors invited selected authors who had participated in or observed the explosive development of biochemistry and molecular biology particularly in the second half of this century to record their personal recollections of the times and circumstances in which they did their work The authors were given a completely free rein with respect to both content and style and the editors have made no attempt to impose any sort of uniformity in the chapters Each reflects the flavour of the personality of the author The contributors to this volume encompass a wide variety of experiences in many different countries and in very different fields of biochemistry Some have worked close to the laboratory bench throughout their scientific life and are continuing to do so Others have been closely engaged in organisational matters both nationally and internationally All mention incidents in their own career or have observed those in others that will be of interest to future historians who will record and assess the period in which our contributors lived and worked It was an extremely exciting time for life sciences **The History of the Health Care Sciences and Health Care, 1700-1980**

Jonathon Erlen,1984 5004 entries to selected monographic and serial literature that guide the reader through the history of science and technology International subject coverage Introduction discusses sources of references Arrangement is by MeSH 1980 subject headings An asterisk indicates an academic thesis or dissertation Each entry gives the bibliographical information and brief annotation Index **The Influence of Biochemistry in Modern Life** Juda Hirsch Quastel,1956

Selected Topics in the History of Biochemistry: Personal Recollections VI R. Jaenicke,G. Semenza,2000-11-09 These

volumes are of interest to bioscientists and to historians alike. Many authors both as individuals and as scientists lived and worked in the age of extremes in the so called short 20th century and yet contributed significantly to the unprecedented development of life sciences in this period. These oral histories set against a backdrop of the Second World War, Holocaust and Stalinist terror are thus of interest and relevance to older and younger generations alike. Perhaps the lessons learned from these first hand accounts may contribute in some way to ensuring that future scientists can enjoy the fascination of science undisturbed by the avoidable tragedy of man made events. The contributors to this volume in the Comprehensive Biochemistry series encompass a wide variety of experiences in many different countries and in very different fields of biochemistry. Some have worked close to the laboratory bench throughout their scientific life and are continuing to do so. Others have been closely engaged in organizational matters both nationally and internationally. All mention incidents in their own career or have observed those in others that will be of interest to future historians who will record and assess the period in which our contributors have lived and worked. It was an extremely exciting time for the life sciences. It was also a period of major and often tragic historical events that deeply affected the life and work of the generation to which our contributors belong.
