The Life and Work of Professor J.W. Gregory FRS (1864-1932), Geologist, Writer and Explorer Bernard E. Leake, 2011 Gregory's remarkable career and his scientific work are detailed and critically assessed. Accounts of his heroic 1893 expedition to the Rift Valley, a term he coined in Kenya (now the Gregory Rift), his first crossing of Spitzbergen, and his resignation as Leader of the first British Antarctic Expedition of 1901 when racing to the Pole under Scott became the priority. Drawn on unpublished letters. While in Melbourne, he published on mining geology and a series of geography textbooks. His 1901 Lake Eyre expedition in Central Australia initiated the phrase 'The Dead Heart of Australia' and controversy over the source of artesian water. In the Chair of Geology in Glasgow from 1904, he built up the largest first year geology class in the UK, over 400 students. He worked in every field of geology and every continent except Antarctica. He was also involved with the search for a homeland for the Jews in Libya and Angola. He shrewdly realized that Wegener's Continental Drift Theory erroneously supposed that the Pacific Ocean was wider than now before the Atlantic opened. This led to his influential rejection of Continental Drift. He drowned in Peru, traversing the Andes, having published over 30 books and nearly 400 articles.

The Water Book Alok Jha, 2015-05-21 Water is the most every day of substances. It pours from our taps and falls from the sky. We drink it, wash with it, and couldn't live without it. Yet on closer examination, it is also a very strange substance; it is one of only a very small number of molecules which expand when cooled. Look closer again, and water reveals itself as a key to a scientific story on the biggest of canvases. Water is crucial to our survival; life depends on it, but it was also fundamental in the origins of life on Earth. The millions of gallons of water which make up our rivers, lakes, and oceans originated in outer space. How it arrived here and how those molecules of water were formed is a story which takes us back to the beginning of the universe. Indeed, we know more about the depths of space than we do about the furthest reaches of the oceans. Water has also shaped the world we live in. Whether it is by gently carving the Grand Canyon over millennia or in shaping how civilisations

were built we have settled our cities along rivers and coasts Scientific studies show how we feel calmer and more relaxed when next to water We holiday by the seas and lakes Yet one day soon wars may be fought over access to water The Water Book will change the way you look at water After reading it you will be able to hold a glass of water up to the light and see within it a strange molecule that connects you to the origins of life the birth and death of the universe and to everyone who ever lived *Going to the Sources* Anthony Brundage,2017-04-27 It s been almost 30 years since the first edition of *Going to the Sources A Guide to Historical Research and Writing* was first published Newly revised and updated the sixth edition of this bestselling guide helps students at all levels meet the challenge of writing their first or their first real research paper Presenting various schools of thought this useful tool explores the dynamic nature and professional history of research papers and shows readers how to identify find and evaluate both primary and secondary sources for their own writing assignments This new edition addresses the shifting nature of historical study over the last twenty years *Going to the Sources A Guide to Historical Research and Writing* includes A new section analyzing attempts by authors of historical works to identify and cultivate the appropriate public for their writings from scholars appealing to a small circle of fellow specialists to popular authors seeking mass readership A handy style guide for creating footnotes endnotes bibliographical entries as well as a list of commonly used abbreviations Advanced Placement high school and undergraduate college students taking history courses at every level will benefit from the engaging thoughtful and down to earth advice within this hands on guide **Life and Nature Under the Tropics** Henry Morris Myers,Philip Van Ness Myers,1871 *The Life and Letters of Elizabeth Prentiss* Elizabeth Prentiss,George Lewis Prentiss,1882 **Catalogue of the Science Library in the South Kensington Museum** South Kensington Museum.
