**Tense and Aspects in Discourse** Co Vet, Carl Vetters, 2011-06-01 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science. TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing.

*Tense and Aspect in Obolo Grammar and Discourse* Uche Ekereawaji Aaron, 1999. Describes comprehensively and systematically the function of tense and aspect in the Obolo language, southeastern coastal Nigeria.

*Tense and Aspect in Discourse* David Dowty, 1986. No detailed description available for Situations Tense and Aspect.

*Situations, Tense, and Aspect* Renate Bartsch, 1995. Tense, aspect and discourse structure Jakob Egetenmeyer, Sarah Dessì Schmid, Martin G. Becker, 2024-09-23. Tense and aspect are crucial devices of sentence meaning. They interact with Aktionsart but also with verb types and adverbs when indicating temporal relations and building temporal discourse structure. On the discourse level they are co-determined by narrative functions enhancing the complexity of their description. The volume depicts this vast field. It unites twelve contributions which elaborate on three thematic cores: 1. the context sensitivity of tense and aspect and their relationships with neighbouring categories; 2. their interaction with adverbs; 3. their functioning in discourse. The volume advances our knowledge of the matters at hand in different respects. It discusses the onomasiological status of categories such as temporality and aspectuality critically. It addresses the functioning of tense in discourse from various angles. A further focus is placed on the imperfective past tense aspect form, its uses and meaning potentials. Its analysis ranges from marking evidentiality to indicating perspectives. The volume combines papers with various theoretical approaches and methodologies, notably formally oriented linguistics and data-driven accounts. The multiplicity of subjects and methods may resonate beyond the field of Romance linguistics.

Tense-Aspect Paul J. Hopper, 1982-01-01. The verbal categories of tense and aspect have been studied traditionally from the point of view of their reference to the timing and time perspective of the speaker's reported experience. They are universal categories both in terms of the semantic functional domain they cover as well as in terms of their syntactic and morphological realization. Nevertheless, their treatment in contemporary linguistics is often restricted and narrow-based, often involving mere recapitulation of traditional semantic and morphotactic studies. The present volume arises out of a symposium held at UCLA in May 1979 in which a group of

linguists gathered to re open the subject of tense and aspect from a variety of perspectives including in addition to the traditional semantics also discourse pragmatics psycholinguistics child language Creolization and diachronic change The languages discussed in this volume include Russian Turkish English Indonesian Ameslan Eskimo various Creoles Mandari Hebrew Bantu and others The emphasis throughout is not only on the description of language specific tense aspect phenomenon but more on the search for universal categories and principles which underlie the cross language variety of tense and aspect In particular many of the participants address themselves to the relationship between propositional semantics and discourse pragmatics in so far as these two functional domains interact within tense aspect systems

**Time and the Verb** Robert I. Binnick, 1991-06-20 This comprehensive examination of tense and grammatical aspect provides fascinating insight into how languages indicate distinctions of time Providing an in depth survey of the scholarship from the ancient Greeks through the 1980s Time and the Verb explains and evaluates every major issue and theory concentrating on familiar Classical and modern European languages An invaluable reference tool as well as a major contribution to the history of linguistic sciences this book will be the standard against which future work on tense and aspect is measured

**The Oxford Handbook of Tense and Aspect** Robert I. Binnick, 2012-06-14 This Handbook is a comprehensive authoritative and accessible guide to the topics and theories that current form the front line of research into tense aspect and related areas

**Recent Advances in the Syntax and Semantics of Tense, Aspect and Modality** Louis de Saussure, Jacques Moeschler, Genoveva Puskás, 2008-09-25 It is a fact that tense aspect and modality together form one of the most recurring and active areas of research in contemporary syntax and semantics as well as in other disciplines of linguistics A large number of syntactic and semantic phenomena are concerned by the temporal aspectual modal level of representation information about time aspect and modality is part of virtually all sentences inflexion is quite widely considered as the core of syntactic projections Because of this very crucial situation and role in the sentence structure temporal aspectual and modal information concerns virtually any part of the sentence and this information has scope over the whole characterization of the eventuality denoted by the sentence This book is an up to date milestone for the studies of temporality and language in particular regarding syntax and semantics but with incidental hints to pragmatics and theories of human natural language understanding Through this very tight selection of 15 papers originally delivered during the 6th Chronos colloquium tenses aspect and modality are investigated both at the descriptive and theoretical levels involving many different Indo European and non Indo European languages The volume sheds light on a wide array of phenomena that remained too little explored until now These include the following modal subordination in Japanese epistemic modals in Dutch and English in Free Indirect Speech contexts aspectual readings of idioms adverb licensing with the German perfect French imperfective past compared with English progressive past infinitival perfect in English Adult Root Infinitives economy constraints on temporal subordinations future modality past interpretation of present tense in embedded clauses and time without tenses in Mandarin

and Navajo The book is of interest to scholars and advanced students in the fields of linguistics general linguistics semantics syntax as well as philosophy and logic Tense and Aspect in Advanced Swedish Learners' Written English Andreas Eriksson, 2008 Literaturverz S 233 249 The L2 Acquisition of Tense-aspect Morphology M. Rafael Salaberry, Yasuhiro Shirai, 2002 The present volume provides a cross linguistic perspective on the development of tense aspect in L2 acquisition Data based studies included in this volume deal with the analysis of a wide range of target languages Chinese English Italian French Japanese and Spanish Theoretical frameworks used to evaluate the nature of the empirical evidence range from generative grammar to functional typological linguistics Several studies focus on the development of past tense markers but other issues such as the acquisition of a future marker are also addressed An introductory chapter outlines some theoretical and methodological issues that serves as relevant preliminary reading for most of the chapters included in this volume Additionally a preliminary chapter offers a substantive review of first language acquisition of tense aspect morphology The analysis of the various languages included in this volume significantly advances our understanding of this phenomenon and will serve as an important basis for future research Tense-aspect Paul J. Hopper, 1982-01-01 The verbal categories of tense and aspect have been studied traditionally from the point of view of their reference to the timing and time perspective of the speaker's reported experience They are universal categories both in terms of the semantic functional domain they cover as well as in terms of their syntactic and morphological realization Nevertheless their treatment in contemporary linguistics is often restricted and narrow based often involving mere recapitulation of traditional semantic and morphotactic studies The present volume arises out of a symposium held at UCLA in May 1979 in which a group of linguists gathered to reopen the subject of tense and aspect from a variety of perspectives including in addition to the traditional semantics also discourse pragmatics psycholinguistics child language Creolization and diachronic change The languages discussed in this volume include Russian Turkish English Indonesian Ameslan Eskimo various Creoles Mandari Hebrew Bantu and others The emphasis throughout is not only on the description of language specific tense aspect phenomenon but more on the search for universal categories and principles which underlie the cross language variety of tense and aspect In particular many of the participants address themselves to the relationship between propositional semantics and discourse pragmatics in so far as these two functional domains interact within tense aspect systems **Text, Time, and Context** Richard P. Meier, Helen Aristar-Dry, Emilie Destruel, 2009-10-20 Carlota S Smith was a key figure in linguistic research and a pioneering woman in generative linguistics This selection of papers focuses on the research into tense aspect and discourse that Smith completed while Professor of Linguistics at the University of Texas at Austin Smith's early work in English syntax is still cited today and her early career also yielded key research on language acquisition by young children Starting in the mid 1970s after her move to UT she embarked on her most important line of research In numerous papers the first of which was published in 1975 and in a very important 1991 book *The Parameter of Aspect* Smith analyzed how languages encode time and how they

encode the ways events and situations occur over time Smith's work on the expression of time in language is notable because of its careful analyses of a number of quite different languages including not only English and French but also Russian Mandarin and Navajo Inspired by a year in France in the early 1970s Smith began to analyze the differing ways in which languages encode time and how they encode the ways events and situations occur over time In doing so she developed her signature two component theory of aspect This model of temporal aspect provided an excellent framework for graduate students seeking to analyze the temporal systems of an array of languages including under described languages that are so much the focus of research in UT's Linguistics Department Selected by Carlota Smith herself and by her longtime friends and colleagues this book contains her 1980 piece on temporal structures in discourse her 1986 comparison of the English and French aspectual systems a 1996 paper on the aspect system in Navajo an increasingly endangered language which Smith worked to preserve and her 1980 and 1993 papers on the child's acquisition of tense and aspect Smith who died in 2007 was a trailblazer in her field whose broad interests fed into her scholarly research She was an avid reader who sought to bring the analytic tools of linguistics to the humanistic study of literature by examining the syntactic and pragmatic principles which underlie literary effects Her research on rhetorical and temporal effects in context was integrated into her last book *Modes of Discourse* 2003 The current volume of articles covers much of her most fruitful work on the way in which language is used to express time and will be essential reading for many working and studying in linguistics generally and in semantics particularly

**Tense and Aspect in Italian Interlanguage** Zuzana Toth, 2020-11-23 The expression of time is fundamental in communication and languages have developed a variety of means to encode temporal relations When learning a new language learners are often faced with the challenging task of discovering a new system of temporal relations The present study investigates the development of tense and aspect marking in the interlanguage of L3 Italian learners enrolled in university language courses It examines how the tense aspect system develops in the interlanguage and how the acquisition process is shaped by factors such as the lexical aspectual value of the predicates and discourse grounding The data indicate that both lexical aspect and discourse grounding influence the distribution of verbal morphology in the interlanguage Semantically congruent pairings of lexical aspect verbal morphology and discourse grounding are used more frequently and appropriately than less prototypical combinations The acquisition process is also influenced by the learner's L1 which was mostly German in the context of the present study The study can be used as a guide for curricular decisions in language teaching and for projecting further research on the development of tense aspect marking in multilingual learners

**An MT Oriented Model of Aspect and Article Semantics** Barbara Gawrońska, 1993 *International Research on Multilingualism: Breaking with the Monolingual Perspective* Eva Vetter, Ulrike Jessner, 2019-10-22 This volume contributes to a better understanding of both psycho and sociolinguistic levels of multilingualism and their interplay in development and use The chapters stem from an international group of specialists in multilingualism with chapters from Austria Canada

Germany Hungary Israel Italy Slovakia South Africa Spain and the United States The chapters provide an update on research on third language acquisition and multilingualism and pay particular attention to new research concepts and the exploration of contact phenomena such as transfer and language learning strategies in diverse language contact scenarios Concepts covered include dominant language constellations mother tongue germination factors and communicative competence in national contexts Multilingual use as described and applied in the volume aims at demonstrating and identifying current and future challenges for research on third language acquisition and multilingualism The third languages in focus include widely and less widely used official minority and migrant languages in instructed and or natural contexts including Albanian Arabic Basque English French German Hungarian Italian Romanian Spanish Punjabi Russian Turkish and Vietnamese thereby mapping a high variety of language constellations Tense and Aspect in Discourse Mariana Damova,1999-01-01
