in Volume I and Volume II The program is a numerical method that predicts the detailed pressure distribution on wing body
combinations at transonic Mach numbers less than one and integrates the pressures to obtain aircraft force and moment data
The code has been developed with the intent of providing the user with an easy to use and reliable tool The basic inviscid
prediction method is the modified transonic small disturbance theory program In order to provide accurate surface pressure
predictions on the wing several additional features of the typical transonic flowfield have been incorporated These consist of
the viscous displacement effect local strong viscous interaction at the shock wave foot and at the trailing edge including an
approximate treatment of local shallow separations and finally the interaction effect of the fuselage **NASA SP.**, 1969
