Story Of Fritz Haber:

The Story of Fritz Haber Morris Goran, 1967 Haber was Nobel Prize winner in chemistry discoverer of nitrogen fixation and developer of poison gas for warfare *Fritz Haber* Dietrich Stoltzenberg, 2004 This long awaited biography of Fritz Haber now abridged by the author and translated into English illuminates the life of one of the most gifted yet controversial figures of the 20th century Haber was a pioneer in electrochemistry and thermodynamics and won the Nobel Prize for his synthesis of ammonia a process essential for both fertilizer and explosives His dedication to work spurred his efforts to increase support for scientific study in Germany yet it also helped cause the breakdown of his two marriages His ardent patriotism led him to develop chemical weapons for World War I and to try to extract gold from seawater to help pay for Germany's huge war reparations Yet Haber a Jew by birth was exiled from his homeland in 1933 by the Nazi party and died shortly after

Fritz Haber: Chemist, Nobel Laureate, German, Jew Dietrich Stoltzenberg, 2019-08-09 This biography of Fritz Haber now abridged by the author and translated into English illuminates the life of one of the most gifted yet controversial figures of the twentieth century Haber a brilliant physical chemist carried out pioneering research in electrochemistry and thermodynamics and won the Nobel Prize for his synthesis of ammonia a process essential for synthetic fertilizer and for the explosives Germany needed in World War I An ardent patriot Haber also developed chemical weapons Believing them to be no worse than other types of warfare he directed the first true gas attack in military history from the front lines in Ypres Belgium in 1915 His nationalism also spurred his failed attempt to extract gold from seawater in hopes of paying off Germany's huge war reparations Yet Haber a Jew by birth was exiled from his homeland in 1933 by the Nazis and died the following year never knowing the full dire effects of his work as Zyklon B a gas studied in his institute around 1920 was used to murder prisoners in concentration camps including members of Haber's own family With the help of previously unpublished documents and sources Dietrich Stoltzenberg explores Haber's personal life the breakdown of his two marriages his efforts to develop industrial and political support for scientific study in Germany his directorship of the Kaiser Wilhelm now Max Planck Institute his ethical struggles in times of war and more A much needed and fine new biography of Haber

Oren Harman *The New Republic* This exhaustive biography first published in Germany in 1996 captures Haber's complexity well Based on diligent research it offers significant detail on Haber's professional life for both specialists and generalists Stoltzenberg's work is perhaps as rich a biography as can be written on Haber's achievements This is an excellent biography based on extensive primary research The result is a work that brings to light important facets not just of the life of Fritz Haber but of several decades of evolution of the German scientific milieu Guillaume P De Syon *H Net Reviews of the German edition* winner of the Author's Prize of the German Chemical Society An excellent biography Max Perutz *The New York Review of Books* Stoltzenberg has written a fine biography of this deeply flawed individual This sympathetic and comprehensive account should appeal to general readers as well as to historians and all those interested in the social

responsibility of science David Cahan Nature S succeeds admirably in enlivening the many facets of this remarkable man and his extraordinary career as a creative academic a leading member of the Kaiser Wilhelm Society a shrewd businessman and an influential advisor to various governments in Berlin But Stoltzenberg is equally adept at presenting Haber the private man who had to fight prejudice endure two broken marriages and finally emigration when the Nazis came to power in 1933 Stoltzenberg s superb biography which leaves little to be desired is the remarkable achievement of a professional chemist turned historian Peter Alter Ambix The book demonstrates Haber s versatility as well as his enormous but not inexhaustible vitality T he most detailed best documented portrait we have of a remarkable and still controversial scientist Jeffrey A Johnson Isis Haber has finally found his ideal biographer in Dietrich Stoltzenberg who possesses impeccable credentials for the task A product of exemplary scholarship George Kauffman Annals of Science *Literature on the History of Physics in the 20th Century* J. L. Heilbron, Bruce R. Wheaton, 1981 **Between Genius And Genocide** Daniel Charles, 2011-03-31 In January 1934 as Hitler s shadow began to fall across Europe a short bald man carrying a German passport arrived at the Hotel Euler in Basle He seemed haunted and restless as though he urgently needed to be elsewhere Fritz Haber Nobel laureate in chemistry confidante of Albert Einstein and German war hero had arrived in Basle a broken man and three days later he died leaving an uncertain legacy For some the great German chemist was a benefactor of humanity winner of a Nobel prize for inventing a way to nourish farmers fields with nitrogen captured from the air For others he was a war criminal who personally supervised the unleashing of chlorine clouds against British French and Canadian troops in World War I Tragedy marked his life A week after the first gas attack in 1915 Haber s wife took his pistol and shot herself And in 1933 when Hitler came to power the Jew Haber was among the first scientists driven out of Germany Within a year Haber was dead denied honour both in his homeland and abroad No life reveals the moral paradox of science its capacity to create and destroy more clearly than Fritz Haber s *Between Genius and Genocide* is a story filled with ambition patriotism hubris and tragedy set amidst huge technological advances arms races mounting imperialism and war *Unsung Heroes of World History: Stories of Remarkable Individuals* Rowena Malpas, Discover the untold stories of remarkable individuals who shaped our world in *Unsung Heroes of World History Stories of Remarkable Individuals* This compelling book brings to light the lives and contributions of often overlooked pioneers visionaries and champions across various fields From scientists and innovators to human rights activists and environmental guardians each chapter delves into the extraordinary achievements and enduring legacies of these unsung heroes Perfect for history enthusiasts and curious minds this book celebrates the diverse and impactful contributions of individuals who have made a lasting difference in our world **History-making** Rolf Torstendahl, Irmeline Veit-Brause, 1996 This volume is based on the proceedings of a conference organised in September 1994 under the title *The Past of History* It was organised by members of the Commission of Historiography affiliated to the Comite International des sciences Historiques and was sponsored by Kungl Vitterhets Historie och Antikvitets Akademien The Royal

Academy of Letters History and Antiquities through the Natur und Kultur foundation at its disposal There eleven papers were presented The published papers want to illuminate the characteristics of the discipline of history from two main angles the philosophical analysis of the intellectual basis for the study of history and the social analysis of the establishment of the discipline of history *The Story of Fritz Haber* Morris Goran,1967 **Indian Journal of History of Science** ,2002

Fritz Haber William Hertz, On the morning of January 29 1934 in a modest hotel room in Basel Switzerland a 65 year old German Jewish scientist died in exile from the country he had once served with fervent patriotism The man was Fritz Haber and his passing marked the end of one of the most consequential yet deeply contradictory lives in modern scientific history Few scientists have left a legacy as profoundly ambivalent as Haber s a legacy that encompasses both humanity s salvation and its suffering In the pantheon of 20th century scientists Fritz Haber occupies a position of singular complexity He was a chemist whose groundbreaking work in nitrogen fixation the Haber Bosch process has sustained billions of human lives by enabling the mass production of agricultural fertilizers Yet this same brilliant mind also pioneered chemical warfare during World War I personally overseeing the first large scale chlorine gas attack at Ypres in 1915 The juxtaposition is stark the same man who helped feed the world also weaponized science to asphyxiate soldiers in trenches Haber s life story offers a remarkable lens through which to examine the relationship between science nationalism ethics and human progress His biography traverses the tumultuous landscape of modern German history from the Wilhelmine Empire through World War I the Weimar Republic and finally the rise of National Socialism that forced him into exile Through it all Haber remained a man of paradoxes a patriotic German Jew who converted to Christianity yet was ultimately rejected by his homeland a humanitarian scientist who became a military strategist and a Nobel laureate who was both celebrated and reviled

Technology and Culture ,1969 *From My Life* Richard Willstätter,1965 Master Mind Daniel Charles,2009-05-01 Fritz Haber a Nobel laureate in chemistry a German Jew and WW1 hero may be the most important scientist you have never heard of The Haber Bosch process which he invented at the turn of the 20th century revolutionized agriculture by converting nitrogen to fertilizer in quantities massive enough to feed the world The invention has become an essential pillar for life on earth some two billion people on our planet could not survive without it Yet this same process supplied the German military with explosives during WW1 and Haber orchestrated Germany s use of an entirely new weapon poison gas Eventually Haber s efforts led to Zyklon B the gas later used to kill millions including Haber s own relatives in Nazi concentration camps

Science--dramatic Eva-Sabine Zehelein,2009 Science Plays form a flourishing dramatic sub genre The present study provides an informative overview shedding light on the diversity of ways in which the natural sciences and or scientists are put on stage Detailed text based analyses of eighteen plays many of them previously unexamined elsewhere exemplify the

genre's remarkable variety. Classics such as *Copenhagen* and *Arcadia* are discussed as well as e.g. *Proof*, *QED*, *Taboos*, *Remembering Miss Meitner*, *An Experiment With an Air Pump*, *Blinded by the Sun* and *Einstein's Gift*. All plays look critically at scientific progress or promise, pointing at socio-political and ethical challenges for today as well as the future. The plays' analyses are embedded into discussions of two vital discourses: the Two Cultures and the Science Wars, as well as the drama vs. performance studies paradigm. Together with background material on various themes, events and personae, *Science Dramatic* broadens into a comprehensive work on the science drama society interface.
