Science and Affect in Contemporary

Literature Shannon Lambert,2024-11-14 Moving from the micro world of quantum physics to the macro scales of earth science and ecology this book considers how in contemporary literature affective experiences like desire suffering anxiety and joy shape scientific persons practices and products This book brings into dialogue close readings of scientific writing and contemporary literary works by authors like Jeanette Winterson Richard Powers Hanya Yanagihara Thalia Field and Jenny Offill Combining narrative and affect studies it uses formal strategies such as moving metaphor visceral or affective description plot level analogy contraction and rhythm to engage with western scientific epistemologies which still tends towards the impassive universal and objective While each chapter focuses on a different field or fields of science all foreground bodies human and nonhuman as a way of exploring knowledge production Through close readings the book argues that select scientific stories raise important questions about how knowledge is defined and who and what is invited into its processes of production

Surreal Entanglements Louise Economides,Laura Shackelford,2021-05-18 This edited collection approaches the most pressing discourses of the Anthropocene and posthumanist culture through the surreal yet instructive lens of Jeff VanderMeer's fiction In contrast to universalist and essentializing ways of responding to new material realities VanderMeer's work invites us to re-imagine human subjectivity and other collectivities in the light of historically unique entanglements we face today the ecological technological aesthetic epistemological and political challenges of life in the Anthropocene era Situating these messy multi-scalar material complexities of life in close relation to their ecological material and colonialist histories his fiction renders them at once troublingly familiar and strangely generative of other potentialities and insight The collection measures VanderMeer's work as a new kind of speculative surrealism his texts capturing the strangeness of navigating a world in which nature has become radically uncanny due to global climate change and powerful bio-technologies The first collection to survey academic engagements with VanderMeer this book brings together scholars in the fields of environmental literature science fiction genre studies American literary history philosophy of technology and digital cultures to reflect on the environmentally culturally aesthetically and politically central questions his fiction poses to predominant understandings of the Anthropocene
