*Permit Trading in Different Applications* Bernd Hansjürgens, Ralf Antes, Marianne Strunz, 2011-06-16 Permit trading is an environmental policy instrument that has received increasing levels of attention over recent years Coming from the field of air quality management with the European CO2 emissions trading system being the most prominent example it enters new fields of application such as land use policy and biodiversity protection water quality and water quantity trading This book gives an overview of these recent developments and discusses the possibilities and limits of permit trading in environmental policies The advantages of permit trading are not only seen with respect to economic efficiency which leads to achieving the environmental target at minimum cost but also with respect to the instrument's environmental effectiveness By setting a cap for the overall emissions a given environmental target can be met This makes permit trading an interesting case for many environmental fields where safeguarding the environmental target plays a dominant role Against this background permit trading is discussed in environmental policy fields where it has not been considered before for example land use management biodiversity protection and water trading Permit Trading in Different Applications analyses the properties of permit trading its possibilities and limitations its design options and its restrictions on a more general level It demonstrates how lessons learnt in established policy fields like air quality management can be transferred to new and emerging fields of application

This collection will provide students and practitioners in environmental sciences and policy with valuable research into instrument choice and design with respect to permit trading      *Annual Report Ontario. Department of Agriculture and Food,1896*      *What causes Momentum Returns? Evidence from different Asset Classes* Fabian Hertel,2022-03-21 Seminar paper from the year 2021 in the subject Business economics Investment and Finance grade 2 0 University of M nster language English abstract This paper discusses possible asset specific and cross asset explanation approaches for momentum appearance The two main threads in literature stock momentum and momentum of other assets are discussed separately and subsequently checked for overlaps The paper also deals with the definition of momentum as an anomaly itself in context of rational and behavioral concepts It uncovers selected contrary observations and outlines possible conformities Capital market anomalies are a phenomenon triggering ongoing debates about the trading behavior of investors on financial markets They are contradicting the core ideas of the efficient market hypothesis EMH which considers financial markets efficient and investors rational and fully informed One of the EMH key hypotheses especially supported by Fama and by Samuelson is the principle of random walk If this principle holds the prices of assets on financial markets are only influenced by public and firm specific news develop apart from that completely random and are not predictable However empirical observations question the random walk principle They tend to indicate specific patterns in asset price developments instead of complete randomness Doubts on the EMH and the random walk principle thus cannot be neglected A common answer to these observations is the existence of additional risk factors which are currently not covered by the applied pricing models Current asset pricing models mainly rely on Markowitz 1952 and the modern portfolio theory as well as on the Capital Asset Pricing Model CAPM from Sharpe 1964 Lintner 1965 and Mossin 1966 These models are rather a benchmark for asset pricing than perfect constructions covering all and any existing risk factors which are relevant for an assets price formation      **Punch** Mark Lemon, Henry Mayhew, Tom Taylor, Shirley Brooks, Francis Cowley Burnand, Owen Seaman, 1895      *American Economist* ,1899      **The Cornhill Magazine** ,1889      **The right and wrong of compulsion by the State.
