Strategic Alliance:

Strategic Alliance Management Brian Tjemkes, Pepijn Vos, Koen Burgers, 2023-06-27 *Strategic Alliance Management* presents an academically grounded alliance development framework detailing eight stages of alliance development with consideration for specific management challenges. For each stage readers are presented with theoretical insights, evidence based managerial guidelines and a business case illustration. Other chapters consider alliance attributes, alliance competences and alliance challenges, and cover topics such as innovation, co-branding, competition, business ecosystems, alliance professionals, alliance capabilities, societal alliances and a tension based alliance mindset. This fully revised 3rd edition leverages the book's strengths in marrying theory with practical insight. All the chapters have been updated to reflect the current academic literature whilst new international case studies are incorporated throughout. Two new chapters feature in this edition considering the importance of the mindset required to successfully navigate alliance arrangements and emerging alliance practices exploring how new technologies, sustainability and the external environment have disrupted alliance management. In chapter text boxes discussing emerging themes provide opportunity for discussion and analysis. The textbook remains highly valuable core and recommended reading for postgraduate students of Strategic Management and Corporate Strategy, MBA and Executive MBA as well as reflective practitioners in the field. Online resources include chapter by chapter lecture slides, two long case studies and short interviews with alliance executives.

International strategic alliances and cultural diversity - German companies getting involved in Iran, India and China Daniela Heidtmann, 2011-10 Business is increasingly affected by the impacts of globalization The technological progress as well as monetary systems have made prices comparable beyond borders If German companies want to withstand the global competition they have to develop sustainable internationalization strategies Since the risks of entering into a strategic alliance are comparatively low in contrast to other internationalization options this topic has gained in importance But a sound preparation is inevitable in order to succeed While technological and economical risks of alliances can be reduced easily by a solid preparation the social risks are highly dependent on the individuals involved and thus hard to prevent Especially in international strategic alliances including the additional complexity of different national cultures social problems can be of high importance German companies which prefer to enter into foreign markets should carefully get acquainted with the foreign country's cultural norms and values Up to today many approaches have been made to define culture and various studies have been performed driven by the desire to understand and provide explanations for cultural differences The results of those studies can be used to evaluate the impacts of a national culture and its specifics on strategic alliances Yet a theoretical study of a foreign culture cannot replace practical experiences However it can provide a starting

point which helps to understand and accept the behavior of a foreign culture Research results provide a good foundation for the identification of basic assumptions which underlie a foreign national culture The general framework of another culture can be investigated understood and even be learned to a certain extent Nevertheless nothing can substitute personal experiences with another culture and its specific beliefs and values Due to the enormous population especially in China and India broadly diversified cultural norms and values according to cultural subcategories can be presumed As the volume of international trade is likely to further grow German companies will be faced with internationalization strategies also in the future If they want to gain a sustainable competitive advantage while going international German companies will continuously be forced to deal with cultural matters A broadly diversified workforce will contribute to this understanding and hence to the international success Nevertheless the cultural values and beliefs of a nation cannot be completely generalized Rather geographical differences and other cultural subcategories have to be borne in mind Some studies about cultural differences have already included such approaches to regional or religious differences but further research is necessary in this field Yet social risks in international strategic alliances which are related to the individuals involved can never be excluded altogether
