for the ancients was the seat of divine authority In Here Comes the Sun Steve Jones shows how life on Earth is ruled by our nearest star It is filled with unexpected connections between the need to stay cool and man s ability to stand upright between the power of memory and the onset of darkness between the flow of solar energy through the plants and animals and of wealth through society and between Joseph Goebbels 1938 scheme to make Edinburgh the summer capital of a defeated Britain and the widening gap in the life expectancy of Scottish men compared to that of other European men brought on by that nation s cloudy climate Its author charts some of his own research in places hot and cold across the globe on the genetic and evolutionary effects of sunlight on snails fruit flies and people and shows how what was once no more an eccentric specialism has grown to become a subject of wide scientific social and political significance Stunningly evocative beautifully written and packed full of insight Here Comes the Sun is Steve Jones s most personal book to date
