Atmospheric Noise Marina Peterson,2021-02-05 In Atmospheric Noise Marina Peterson traces entanglements of

environmental noise atmosphere sense and matter that cohere in and through encounters with airport noise since the 1960s Exploring spaces shaped by noise around Los Angeles International Airport LAX she shows how noise is a way of attuning toward the atmospheric through noise we learn to listen to the sky and imagine the permeability of bodies and matter sensing and conceiving that which is diffuse indefinite vague and unformed In her account the atmospheric encompasses the physicality of the ephemeral dynamic assemblages of matter as well as a logic of indeterminacy It is audible as well as visible heard as much as breathed Peterson develops a theory of indefinite urbanism to refer to marginalized spaces of the city where concrete meets sky windows resonate with the whine of departing planes and endangered butterflies live under flight paths Offering a conceptualization of sound as immanent and non objectified she demonstrates ways in which noise is central to how we know feel and think atmospherically
