*Suicide A Study In Sociology* Emile Durkheim,2025-04 Suicide A Study In Sociology is a groundbreaking sociological work that examines the social causes of suicide The book argues that suicide is often a result of the individual's lack of integration into society Durkheim identifies different social factors and explores how varying degrees of societal cohesion or isolation can impact the likelihood of an individual taking their own life He categorizes suicide into different types such as egoistic altruistic and anomic based on the individual's relationship with society Durkheim's approach is deeply rooted in social theory emphasizing the role of societal norms values and collective consciousness in shaping individual behaviors The work explores how both social instability and social cohesion contribute to suicide providing a deeper understanding of its causes beyond individual psychological factors Through empirical research and statistical analysis Durkheim presents a

sociological perspective on a deeply personal and tragic phenomenon offering invaluable insight into the relationship between individuals and society as well as the social forces that influence personal decisions **Social Meanings of Suicide** Jack D. Douglas, 2015-03-08 This book presents a review and criticism of all sociological literature on suicide from Emile Durkheim's influential *Suicide* 1897 to contemporary writings by sociologists who have patterned their own work on Durkheim's. Douglas points out fundamental weaknesses in the structural functional study of suicide and offers an alternative theoretical approach. He demonstrates the unreliability of official statistics on suicide and contends that Durkheim's explanations of suicide rates in terms of abstract social meanings are founded on an inadequate and misleading statistical base. The study of suicidal actions Douglas argues requires an examination of the individual's own construction of his actions. He analyzes revenge escape and sympathy motives using diaries notes and observers reports he shows how the social meanings of actual cases should be studied.
