The Jagged Orbit:

The Jagged Orbit John Brunner, 2011-09-29 Matthew Flamen the last of the networks spoolpigeons is desperate for a big story He needs it to keep his audience and his job And there is no shortage of possibilities the Gottschalk cartel is fomenting trouble among the knees in order to sell their latest armaments to the blanks which ties in nicely with the fact that something big is brewing with the X Patriots and it looks as if the inconceivable is about to happen and that one of Britain's most dangerous revolutionaries is going to be given a visa to enter America And then there's the story that just falls into his lap The one that suggests that the respected Director of the New York State Mental Hospital is a charlatan Winner of the BSFA Award for best novel 1970 "Co_Aytch," a Side Show of the Big Show Samuel Rush Watkins, 1962-06 The John Brunner Collection Volume One John Brunner, 2018-05-15 Three visionary sci fi novels from the Hugo Award winning author whose dystopian prescience made him one of the most important SF Site British science fiction master John Brunner remains one of the most influential and respected authors of all time and now many of his classic works are being made available to new generations of readers The very definition of timeless Brunner's skillful and often frightening political and social commentary takes its place alongside the most iconic works of Arthur C Clarke Aldous Huxley Margaret Atwood and George Orwell The Sheep Look Up In a near future of poison air and soaring health hazards environmentalist Austin Train is on the run from the insurrectionists who want him to lead and the government that wants him dead in this Nebula Award Finalist An arresting diary of what's in store for us The Washington Post The Crucible of Time On a planet hurtling precariously through space an alien civilization struggles for generations against ice ages and catastrophic meteors while scientists slowly develop the technology that will ultimately save them Impeccably detailed and beautifully thought out even to the fascinating alien personalities speech patterns and thoughts Brunner in top form Kirkus Reviews starred review The Jagged Orbit In this Nebula Award Finalist a journalist tries to expose the corrupt director of a mental hospital in a dystopian future where drug abuse organized crime and the inhumane treatment of anyone deemed insane have all but destroyed social order One of his most trenchant dystopias yet it is as irresistible as it is biting SFReviews net **John Brunner** Jad Smith, 2013-01-30 Under his own name and numerous pseudonyms John Brunner 1934 1995 was one of the most prolific and influential science fiction authors of the late twentieth century During his exemplary career the British author wrote with a stamina matched by only a few other great science fiction writers and with a literary quality of even fewer importing modernist techniques into his novels and stories and probing every major theme of his generation robotics racism drugs space exploration technological warfare and ecology In this first intensive review of Brunner's life and works Jad Smith carefully demonstrates how Brunner's much neglected early fiction laid the foundation for his classic Stand on Zanzibar and other major works such as The Jagged Orbit The Sheep Look Up and The Shockwave Rider Making extensive use of Brunner's letters columns speeches and interviews published in fanzines Smith approaches Brunner in the context of markets and trends that affected many writers

of the time including Brunner's uneasy association with the New Wave of science fiction in the 1960s and 70s. This landmark study shows how Brunner's attempts to cross fertilize the American pulp tradition with British scientific romance complicated the distinctions between genre and mainstream fiction and between hard and soft science fiction and helped carve out space for emerging modes such as cyberpunk, slipstream, and biopunk.

Challenging Anthropocentrism in Eco-Science Fiction Novels

Fatma Gamze Erkan, 2024-01-03 This book explores the relationship between humanity and nature while challenging the notion that anthropocentric behaviour causes the environmental catastrophes depicted in the four selected British eco science fiction novels. These novels are John Christopher's The Death of Grass 1956, J G Ballard's The Drought 1965, Brian Aldiss's Earthworks 1965, and John Brunner's The Sheep Look Up 1972, all of which fictionalise the fact that the consequences of environmental problems can be diverse but equally serious. This book examines how even the smallest damage caused by human beings to the environment negatively affects them, other living beings, and the ecosystem they need to live and flourish. In conjunction with these factors and conditions that push characters in the novels to ignore and harm the environment, are also scrutinised. While examining how and why the environmental problems in the novels have arisen, it is evaluated whether the authors propose solutions to these problems and, if so, what they are.
