**Islam, Family Life, and Gender Inequality in Urban China** Xiaowei

Zang,2012-06-12 This book studies the relationship between Islam family processes and gender inequality among Uyghur

Muslims in r mchi China Empirically it shows in quantitative terms the extent of gender inequalities among Uyghur Muslims

in r mchi and tests whether the gender inequalities are a difference in kind or in degree It examines five aspects of gender

inequality employment income household task accomplishment home management and spousal power Theoretically it

investigates how Islamic affiliation and family life affect Uyghur women's status. Zang's research involved rare and privileged access to a setting which is difficult for foreign scholars to study due to political restrictions. The data are drawn from fieldwork in r mchi between 2005 and 2008 which include a survey of 577 families, field observations and 200 in depth interviews with local Uyghurs. The book combines qualitative and quantitative data and methods to study gendered behavior and outcomes. The author's study reinterprets family power and offers a more nuanced analysis of gender and domestic power in China and makes a pioneering effort to study spousal power, gender inequality in labor market outcomes and gender inequality in household chores among members of ethnic minorities in China. The book will be of interest to students and scholars of ethnic studies, Chinese studies, Asian anthropology and cultural sociology.
