The Judges:

The Judges Martin Mayer, 2014-01-07 Our courts the third branch of the government are central in the administration of our democracy But their operations are shrouded in a mythology with its ritual incantations of rule of law equal justice and presumption of innocence one that this book pierces We have 30 000 judges Many are hard working and distinguished jurists most are simply lawyers who knew a politician It does not help that the job pays poorly We have no judicial profession we do not train judges before or after they mount the bench There is no national court system Fifty sovereign states a federal government counties and municipalities and state and federal agencies all have their own courts their own rules and not infrequently their own laws and are deluged with cases filed by a million lawyers Today less than 3% of criminal charges and 4% of civil disputes are resolved by court trials The noted author argues that a specialized world demands specialized courts and judges expert in the subjects they must consider Following the leadership of Chief Judge Judith Kaye of New York s highest court the Conference of Chief Justices from all fifty states has endorsed her use of problem solving courts to take the judiciary into the twenty first century *The Judges* is Martin Mayer s most important book from many successful titles dating from the 1950s It opens up a debate that will occupy scholars justices many of the one million lawyers in our country and law school professors and students for years to come

The Development of Human Rights Law by the Judges of the International Court of Justice Shiv R.S. Bedi, 2007-01-18 The jurisprudence of the International Court of Justice generally demonstrates that no rule of international law can be interpreted and applied without regard to its innate values and the basic principles of human rights Through its case law the ICJ has made immense contributions to the development of human rights law and in so doing continues to provide solutions to mounting international problems such as terrorism and unilateral use of force Part I of the book argues that the legislative spirit of contemporary international law lies in the doctrine of human rights and that the spirit of human rights doctrine lies in the principle of human dignity Furthermore it argues that the processes of international legislation and international adjudication are inseparable and that there is no norm of international law which does not intertwine the fundamental principle of human dignity with human rights doctrine Hence human rights law is more a school of law than merely a normative branch of international law and the ICJ s willingness to engage in the development of human rights law depends upon which judicial ideology its judges subscribe to In order to evaluate how this human rights spirit is manifested or occasionally not manifested through the vast jurisprudence of the ICJ Parts II and III critically examine the Court s principal contentious and advisory cases in which it has treated human rights questions The legal reasoning of the Court and the opinions appended to its decisions by its individual judges are analysed in light of the principle of human dignity and the doctrine of human rights
