The Ion War:

A History of the Negro Troops in the War of the Rebellion, 1861-1865 George Washington Williams, 1887 A History of the Negro Troops in the War of the Rebellion 1861 1865 by pioneer African American historian George Washington Williams remains a classic text in African American literature and Civil War history In this powerful narrative Williams who served in the U S Colored Troops tells the battle experiences of the almost 200 000 black men who fought for the Union cause Determined to document the contributions of his fellow black soldiers and to underscore the valor and manhood of his race Williams gathered his material from the official records of U S and foreign governments and from the orderly books and personal recollections of officers commanding Negro troops during the American Civil War Description from Fordham University Press edition To Prevent Profiteering in War, Hearing Before a Subcommittee ..., on H.R. 5529 ..., May 25-31, 1935 United States. Congress. Senate. Committee on Military Affairs, 1935 **The Future of War in Its Technical, Economic, and Political Relations** Jan Bloch, 1899 **Gender and Civilian Victimization in War** Jessica L. Peet, Laura Sjoborg, 2019-11-25 This book explores the role of gender in influencing war fighting actors strategies toward the attack or protection of civilians Traditional narratives suggest that killing civilians intentionally in wars happens infrequently and that the perpetration of civilian targeting is limited to aberrant actors Recently scholars have shown that both state and non state actors target civilians even while explicitly deferring to the civilian immunity principle This book fills a gap in the accounts of how civilian targeting happens and shows that these actors are in large part targeting women rather than some gender neutral understanding of civilians It presents a history of civilian victimization in wars and conflicts and then lays out a feminist theoretical approach to understanding civilian victimization It explores the British Blockade of Germany in World War I the Soviet Rape of Berlin in World War II the Rwandan genocide and the contemporary conflict in northeast Nigeria Across these case studies the authors lay out that gender is key to how war fighting actors understand both themselves and their opponents and therefore plays a role in shaping strategic and tactical choices It makes the argument that seeing women in nationalist and war narratives is crucial to understanding when and how civilians come to be targeted in wars and how that targeting can be reduced This book will be of much interest to students of critical security gender studies war studies and International Relations in general To Prevent Profiteering in War United States.
