Ginzburg, 1964 **Arthur's Invariant Trace Formula and Comparison of Inner Forms** Yuval Z. Flicker, 2016-09-14 This monograph provides an accessible and comprehensive introduction to James Arthur's invariant trace formula a crucial tool in the theory of automorphic representations It synthesizes two decades of Arthur's research and writing into one volume treating a highly detailed and often difficult subject in a clearer and more uniform manner without sacrificing any technical details The book begins with a brief overview of Arthur's work and a proof of the correspondence between GL_n and its inner forms in general Subsequent chapters develop the invariant trace formula in a form fit for applications starting with Arthur's proof of the basic non-invariant trace formula followed by a study of the non-invariance of the terms in the basic trace formula and finally an in-depth look at the development of the invariant formula The final chapter illustrates the use of the formula by comparing it for $G = GL_n$ and its inner form G and for functions with matching orbital integrals
