Students Memory:

Memory at Work in the Classroom: Strategies to Help Underachieving Students Francis Bailey, Ken Pransky, 2014-03-04 Why do some students struggle to understand and retain information while other students don't? The answer may well lie in the memory system which is the root of all learning. In *Memory at Work in the Classroom* Francis Bailey and Ken Pransky expertly guide you through the aspects of human memory most relevant to classroom teachers. Real classroom examples help to deepen your understanding of how memory systems play a central role in the learning process as well as how culture plays a sometimes surprising role in memory formation and use. The memory systems covered in the book are Working Memory the gateway to learning, Executive Function the cognitive skills children need to independently orchestrate their memory systems in service to learning, Semantic Memory the storehouse of a person's knowledge of the world including academic concepts and the part of the memory system most affected by culture, Episodic Memory rich multisensory personal memories of specific events, Autobiographical Memory one's sense of self tied directly to student motivation. Although the techniques described apply to all students, the authors concentrate on explaining the source of struggling students' academic challenges and provide effective strategies for helping students become better learners. Whether you're a new or a veteran teacher, this book will offer fresh insights into your students' learning difficulties and move you to explore classroom practices that align with the functioning of memory and the ways students learn. *Child Abuse in Schools* Sushma Pandey, 2021-01-01 Child Abuse is a social psychological problem which is present at epidemic level within and outside the family around the globe. The causes of abuse are multifarious and impacts are very serious and damaging. The main purpose of the book is to explore the social and psychological bases of child abuse in schools and its psychological consequences on students. Specifically, the contributing roles of environmental and socio-demographic variables in the incidence and prevalence of child abuse in schools have been examined. Further, identifying the psychological characteristics of abusers/perpetrators, it explores various forms of abuses in different types of schools. Moreover, it tries to examine the impact of school abuse on cognitive, motivational, affective, and behavioural functioning of students. Finally, it has attempted to explore the effects of child abuse on personality development and health status of students. This book recommends developing and implementing school-based preventive/promotive intervention programmes to check incidence of abuse in schools and its detrimental consequences on students. **Learning About Learning Disabilities** Po-Zen Wong, Bernice Wong, 2014-05-19 This is the first textbook to give equal attention to the intellectual, conceptual, and practical aspects of learning disabilities.
