Studies In Human Time:

Studies in Human Time Georges Poulet, 1956 **Physical Time Within Human Time** Anne Giersch, Leonardo P.G. De Assis, 2023-11-13 There is a gap between the concept of time in physics and that in neuroscience Human time is dynamic and involves a dynamic flow whereas physical time is said to be frozen as in Einstein's Block Universe The result has been a fierce debate as to which time is real Our recently accepted paper by Frontiers provides a compromise dualistic view The claim is that within the cranium there already exists an overlooked complete and independent physical system of time that is compatible with the essence of modern spacetime cosmology However the brain through a process of evolution developed a complementary illusory system that provides a supplementary more satisfying experience of temporal experiences that leads to better adaptive behavior The Dualistic Mind View provides evidence that both systems of time exist and are not competitive Neither need be denigrated **Understanding Human Time** Kasia M. Jaszczolt, Katarzyna Jaszczolt, 2023 This book explores the time that we think we experience and the concept of time in our beliefs our knowledge and our fears The chapters bring together insights from linguists and philosophers to examine questions about time on the micro level of physical reality as well as time in language and discourse on the macro level of social reality **Analysis of Work Stoppages, 1964** United States.
