## **Study Sense:**

*Learning for Meaning's Sake* Stephanie Mackler, 2009-01-01 Universities and the societies they serve suffer from a crisis of meaning We have fanatically developed our ability to produce knowledge leaving our ability to craft meaning by the wayside University graduates often have an abundance of knowledge but lack the wisdom to use it meaningfully Meanwhile people inside and outside academia are searching for meaning but are imprisoned in a lexicon of clichés and sound bites that stunts their quest In response *Learning for Meaning's Sake* begins with the assertion that higher education in the 21st century should renounce its obsession with job training and knowledge production and should instead turn toward questions of meaning Drawing upon a diverse range of philosophical thought *Learning for Meaning's Sake* offers the vision and philosophical foundation for a new type of higher learning one that is devoted to the existential questions at the core of human existence

*Organizing for School Change* Karen Seashore Louis, 2013-01-11 Improving education is a key priority for governments around the world While many suggestions on how best to achieve this are currently under debate years of academic research have already revealed more about how to encourage change than is sometimes assumed This volume brings together for the first time some of the most significant work of Karen Seashore Louis one of the foremost thinkers and researchers in the field *Organizing for School Change* presents a unique variety of research based results from studies conducted over the past twenty five years What emerges is not an idealistic plan but a realistic picture of what needs to be done if schools are to be made better Drawing on a wide and comprehensive list of sources the ideas brought together in this collection will prove invaluable and insightful reading stimulating both newcomers and veterans of the field to consider educational research in new ways

**Re-Enchanting Education and Spiritual Wellbeing** Marian de Souza, Anna Halafoff, 2017-09-14 Education is in a constant state of renewal internationally where it responds to a number of pressing social political and cultural issues Processes of globalization a number of conflicts and acts of terror economic and environmental crises have led to large waves of migration and asylum seekers arriving in countries with the hope of finding safer and more stable places to settle This in turn has led to cultural and religious pluralism being a key characteristic of many societies with corresponding issues of belonging and identity As well for many people there has been a shifting influence of and allegiance away from traditional religious frameworks with the emergence of new religious movements both peaceful and violent and a rise in popularity of spirituality and non religious worldviews which provide alternate frameworks for living healthy and ethical lives In order to prepare today's student for tomorrow's world one which is confronted by a range of risks and crises and which is being shaped by rapidly changing technologies educators and researchers are investigating new ways of equipping students to deal with these challenges and opportunities including the nurturing of spiritual wellbeing This book brings together the voices of many experienced educators to discuss ways to re-enchant education and re-enliven learning programs in response to these 21st century issues in an increasingly global and

interconnected world It examines a range of international contexts including secular and religious educational settings and provides an avenue for visionary voices that identify problems and offer solutions to help shape a more promising education system that will prepare children more constructively and beneficially to flourish in their future worlds The Student's Journal ,1889

**A New Meaning-Mission Fit** Michelle French-Holloway,2020-05-11 This book offers a clear process for managers professionals and future leaders to help discover their personal meaning in life and apply it to their work The author uses research outcomes and theories to refute the contemporary philosophy that stresses following an individual s passion alone when choosing a particular job or career Instead she recommends employing a personal meaning oriented approach to life and work and then becoming passionate about one s work organically The book also highlights the positive outcomes to organizations and societies when individuals engage with finding meaning in work focusing on physical and emotional health and satisfaction The author provides numerous examples of leaders who have aligned their personal meaning and organizational mission also known as meaning mission fit and the relationship of this alignment to their emotional well being Together the research theory and evidence in this book equip leaders and managers with an inspiring model to find their own meaning mission fit as well as create opportunities for the employees to do the same **The Westminster Review** ,1882 **The Edinburgh Review** ,1879 **The Princeton Review** ,1878 *The Ethical Functions of Scientific Study* Thomas Chrowder Chamberlin,1888 *Daily Report* ,1971-07-13 The Sunday-school World ,1900

**The Dublin University Magazine** ,1877 Reasonable Children Michael S. Pritchard,1996 The public outcry for a return to moral education in our schools has raised more dust than it s dispelled Building upon his provocative ideas in *On Becoming Responsible* Michael Pritchard clears the air with a sensible plan for promoting our children s moral education through the teaching of reasonableness Pritchard contends that children have a definite but frequently untapped capacity for reasonableness and that schools in a democratic society must make the nurturing of that capacity one of their primary aims as fundamental to learning as the development of reading writing and math skills Reasonableness itself he shows can be best cultivated through the practice of philosophical inquiry within a classroom community In such an environment children learn to work together to listen to one another to build on one another s ideas to probe assumptions and different perspectives and ultimately to think for themselves Advocating approaches to moral education that avoid mindless indoctrination and timid relativism Pritchard neither preaches nor hides behind abstractions He makes liberal use of actual classroom dialogues to illustrate children s remarkable capacity to engage in reasonable conversation about moral concepts involving fairness cheating loyalty truth-telling lying making and keeping promises obedience character and responsibility He also links such discussions to fundamental concerns over law and moral authority the roles of teachers and parents and the relationship between church and state Pritchard draws broadly and deeply from the fields of philosophy and psychology as well as from his own extensive personal experience working with children and teachers The result is a rich and insightful work that

provides real hope for the future of our children and their moral education      *The Orum System of Voice Education for Reading and Conversation, for Recitation, Dramatic Expression and Bible Reading* Julia Anna Orum,1893      The American Cyclopaedia George Ripley,Charles Anderson Dana,1883      *On Primary Instruction in Relation to Education* Simon Somerville Laurie,1874      **Studies in Texts** Joseph Parker,1898      **Harvard Law Review** ,1892      **University Extension** ,1891      **The University correspondent and University correspondence college magazine (and The Educational review).** ,1891
