Study In Realization:

Shipowners' Limitation of Liability Miguel Correia, 2013-01-06 This book refines the features of a variety of different common law and civil law systems down to a recognizable standard CIT system identifying in the process the system's core strengths and problems as well as the factors that determine its impact on corporate behavior. The author offers insightful perspectives on such crucial issues as the following: corporate group members versus corporate groups as taxable entities; anti-abuse rules and developments in judicial anti-abuse doctrines; costs associated with e.g. valuation of assets; compliance and administration; how certain core CIT concepts are independent of tax law efficiency; equity and the protection of existing property rights; the firm's reaction to behavioral control instruments; limitations on the use of losses; depreciation and amortization rules; manipulation of legal characterization and transfer of assets and income. The work has an interdisciplinary approach drawing on the literatures of tax law, economics, corporate law, accounting and business management. It concludes with a set of policy guidelines that should be considered when approaching the traditionally cumbersome interaction between tax systems and corporate groups. Especially valuable to the practitioner are the book's extensive graphic design solutions illustrating the subtleties of the operation of corporate tax laws. Analyzing the taxation of corporate groups in a user-friendly form not available in any other source, this book greatly enhances the development of advanced tax planning methods that do not disrupt the economic operation of businesses. Its comprehensive conceptual framework will greatly facilitate the work of those from practitioners to researchers interested in developing a practical approach to corporate income taxation applicable at a global level.

But kit drummers are increasingly difficult to ignore. While exponents of the drum kit are frequently mocked in popular culture, they are also widely acknowledged to be central to the

musical success and aesthetic appeal of any musical ensemble in which they are found Drummers are also making their presence felt in music education with increasing opportunities to learn their craft in formal contexts Drawing on data collected from in depth interviews and questionnaires Gareth Dylan Smith explores the identities practices and learning of teenage and adult kit drummers in and around London As a London based drummer and teacher of drummers Smith uses his own identity as participant researcher to inform and interpret other drummers accounts of their experiences Drummers learn in multi modal ways usually with a keen awareness of exemplars of their art and craft The world of kit drumming is highly masculine which presents opportunities and challenges to drummers of both sexes Smith proposes a new model of the Snowball Self which incorporates the constructs of identity realization learning realization meta identities and contextual identities Kit drummers identities practices and learning are found to be intertwined as drummers exist in a web of interdependence Drummers drum therefore they are they do and they learn in a rich tapestry of means and contexts **A**
