

Exam 1 Study Guide Chapters 1 & 2

CHAPTER 1: Human Inquiry & Science

- I. Introduction
- II. Looking for Reality: Understand differences between ways we can observe reality.
These are:

A. Knowledge from Agreement Reality:

- 1. Before scientists accept the reality of something they haven't personally experienced, an assertion must have both logical & empirical support.
- 2. It must make sense & it must not contradict actual observation.
- 3. **Agreement Reality** = those things we "know" as part & parcel of the culture we share w/ those around us
- 4. **Epistemology** = the science of knowing; systems of knowledge
- 5. **Methodology** = (a subfield of epistemology) the science of finding out: procedures for scientific investigation
- 6. Both assists & hinders our attempts to find out for ourselves.

B. Ordinary Human Inquiry:

- 1. People predict their future circumstances using causal & probabilistic reasoning.
- 2. Aims at answering both "what" & "why" questions, and we pursue these goals by observing & figuring out.

C. Tradition:

- 1. We inherit a culture made up, in part, of firmly accepted knowledge about the workings of the world & the values that guide our participation in it.
- 2. The things that "everybody knows"
- 3. Advantage can be that we don't necessarily have to start from scratch in our search for regularities & understanding.

D. Authority:

- 1. Acceptance of new acquisitions depends on the status of the discoverer.
- 2. Like tradition, authority can both assist & hinder human inquiry.
- 3. Inquiry can be greatly hindered by the legitimate authority who errs w/in his/her own special province.
- 4. Inquiry is also hindered when we depend on the authority of experts speaking outside their realm of expertise.

E. What are some of the Errors in Inquiry & Some Solutions? Understand the following:

- 1. **Inaccurate Observations:** make observation more deliberate
- 2. **Overgeneralization:** seek a sufficiently large sample of observations
