## Study Of British Genius:

*A Study of British Genius* Havelock Ellis, 1926      **A Study of British Genius** Henry Havelock Ellis, 2023-10-14 This book presents a general study of British Genius Until now it has not been possible to obtain any comprehensive view of the men and women who have chiefly built up English civilization It has not therefore been possible to study their personal characteristics as a group The sixty three volumes of the Dictionary of National Biography of which the last has been lately issued have for the first time enabled us to construct an authoritative and well balanced scheme of the persons of illustrious genius in every department who have appeared in the British Isles from the beginning of history down to the end of the nineteenth century and with a certain amount of labor it enables us to sum up their main traits      *A Study of British Genius* Havelock Ellis, 1929      *A Study of British Genius* (1904) by Havelock Ellis, 2016-05-14 Henry Havelock Ellis known as Havelock Ellis 2 February 1859 8 July 1939 was an English physician writer progressive intellectual and social reformer who studied human sexuality He was co author of the first medical textbook in English on homosexuality in 1897 and also published works on a variety of sexual practices and inclinations as well as transgender psychology He is credited with introducing the notions of narcissism and autoeroticism later adopted by psychoanalysis He served as president of the Galton Institute and like many intellectuals of his era supported eugenics Ellis son of Edward Peppen Ellis and Susannah Mary Wheatley was born in Croydon Surrey now part of Greater London He had four sisters none of whom married His father was a sea captain his mother the daughter of a sea captain and many other relatives lived on or near the sea When he was seven his father took him on one of his voyages during which they called at Sydney Callao and Antwerp After his return Ellis attended the French and German College near Wimbledon and afterward attended a school in Mitcham In April 1875 Ellis sailed on his father s ship for Australia soon after his arrival in Sydney he obtained a position as a master at a private school After the discovery of his lack of training he was fired and became a tutor for a family living a few miles from Carcoar He spent a year there and then obtained a position as a master at a grammar school in Grafton The headmaster had died and Ellis carried on the school for that year but was unsuccessful At the end of the year he returned to Sydney and after three months training was given charge of two government part time elementary schools one at Sparkes Creek near Scone New South Wales and the other at Junction Creek He lived at the school house on Sparkes Creek for a year He wrote in his autobiography In Australia I gained health of body I attained peace of soul my life task was revealed to me I was able to decide on a professional vocation I became an artist in literature these five points covered the whole activity of my life in the world Some of them I should doubtless have reached without the aid of the Australian environment scarcely all and most of them I could never have achieved so completely if chance had not cast me into the solitude of the Liverpool Range      **A Study of British Genius (Classic Reprint)** Havelock Ellis, 2017-09-17 Excerpt from *A Study of British Genius* The plan of the present book is simple The bulk of the volume is taken up with the succinct co ordination and summation of the data

before us all introduction of foreign matter which might unduly overweight the conclusions at any point being strictly excluded In small type are inserted the results obtained by previous investigators on somewhat similar bodies of data together with the results obtained by the study of other mentally abnormal groups these results are often of the highest significance in enabling us to interpret our conclusions In the Appen dices I have brought together some of the elementary facts on which I have worked the reader is thus enabled to examine and check my methods for himself he will also I hope be able at many points to correct or amplify the original data I had purposed to represent the results of this study graphically by means of curves On consideration how ever it seemed that such a method was unsuited to the nature of the data and might tend to mislead the reader About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

**A Study of British Genius** Havelock Ellis, 2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1904 edition Excerpt is in a large number of cases mentally abnormal from the first and if we were to seek to inquire precisely wherein that mental abnormality consisted With these preliminary remarks we may proceed to note the prevalence among British persons of genius of the undefined conditions commonly termed precocity It is certainly very considerable Although we have to make allowance for ignorance in a large proportion of cases and for neglect to mention the fact in many more cases the national biographers note that 292 of the 1 030 eminent persons on our list may in one sense or another be termed precocious and only 44 are mentioned as not precocious Many of the latter belong to the second group as defined above those who are already absorbed in their own lines of mental activity and are really just as precocious as the others thus Cardinal Wiseman as a boy was dull and stupid always reading and thinking Byron showed no aptitude for school work but was absorbed in romance and Landor though not regarded as precocious was already preparing for his future literary career In a small but interesting group of cases which must be mentioned separately the mental development is first retarded and then accelerated thus Chatterton up to the age of six and a half was said his mother little better than an absolute fool then he fell in love with the illuminated capitals of an old folio at seven was remarkable for brightness and at ten was writing poems Goldsmith again was a stupid child but before he could write legibly he was fond of poetry and rhyming and a little later he was regarded as a clever boy while Fanny Burney did not know her letters at eight but at ten was writing
